"This is a book whose primary appeal will necessarily be to those whose business it is to write, publish, review or sell books, but will still be of considerable interest to those who only read them. It is composed of three essays. One, philosophical in tone and amazingly comprehensive for its length, is by Mr. Stanley Unwin, who expresses a set of opinions with which no one of lesser experience would be wise to argue; the second, by Mr. George Stevens, describes how, but does not attempt to explain why, some two score books became best-sellers in the United States of America; the third, couched in the bleak accents of an elder statesman of letters, is by Mr. Frank Swinnerton, who—but for a few half-hearted qualifications—seems to regard all advertising as an unnecessary evil. The excellence of Mr. Stevens' section makes one regret that he has no English counterpart." Derek Verschoyle

231 God. Jesus Christ—Person and offices. Holy Spirit 39-12126

"In our street" is the author's way of saying that he intends to bring the discussion into the range of the ordinary man's thinking. "His line of thought tends to conserve all the orthodox terminology and concepts and to give them meanings consistent with a modern attitude. It should be quickly added that this does not mean erecting a screen of orthodoxy behind which to sabotage the orthodox positions." (Christian Century) Selected bibliography. Index.

"Stewart's procedure is both honest and intelligent, and his approach has value as indicating how one may be a practical liberal and at the same time 'hold fast the form of sound words.' "In this short religious autobiography the author tells how she lost her early faith and how she found a satisfactory faith in later years. It was evidently the churches that bothered her. As a child she thought that the Te Deum should have been called the Te Dious! But it was after confirmation that her questioning began, and from doubt about the resurrection of the body she passed into a period of more or less general unbelief. She came back to the creed of the church at length however; and the story of how she rediscovered it may help others who are in doubt." Churchman

Personal memoirs of an American naval officer who saw active service in the Spanish-American war, in the Philippines, and in the World war.

Booklist 35:364 Jl 1 '39

"The book is significant in its faithful recording of the growth of a naval career. Here, with unmistakable fidelity, we may learn an officer's reaction to command responsibility, to emergencies, to his ship's reputation, to parting with a happy ship, to the whole naval tradition. The first several pages, dealing with the author's youth, I found unconvincing. They appear to be romantically concocted in the vein of 'The American Midshipman Series,' a set of boys' books penned by Admiral Stirling thirty-five years ago. Once past these, however, the portrait is authentic; this is indeed the skipper to whose ship I reported, fresh from the Naval Academy, nearly sixteen years ago." R. F. Armknecht

"Rear Admiral Stirling's projectile entitled 'Sea Duty' misses the target. He offers 309 pages of reminiscences and anecdotes described as 'The Memoirs of a Fighting Admiral,' but unfortunately the reminiscences lack vividness, the anecdotes are almost entirely personal, devoid of humor, and outside of a few skirmishes during the Spanish War and Philippine Insurrection fighting formed a small part of the Admiral's career. The book has a few chapters of interest." P. J. Searles

"It is not necessary to have read the first volume of Miss Weeton's journals and letters to be moved, amused, amazed and shocked by this present record of the experiences of an English governess in the first quarter of the nineteenth century. This book contains a synopsis of the earlier events of Miss Weeton's life, and it takes up its story after so complete a break that it may well stand alone. Miss Weeton is off for a holiday on the Isle of Man as these writings begin, and then she goes to her new position as governess in a mill owner's family." N Y Times

"It is easy to pronounce and hard to refute the dictum that, given even slightly different circumstances, the author might well have been another Brontë, for unquestionably she had the literary gift. And if the picture she paints is not a pleasing one, if she is as self-sympathetic as, let us say, Marie Bashkirtseff, she has drawn for us as unforgettable a portrait of an age and a society as that very different and more famous diarist, and one at least as readable and perhaps more understandable." STOCKHAUSEN, JULIANA VON (COUNTESS GATTERBURG). Before dawn; tr. by Hilda C. Johnson. 364p $2.50 Dutton [8s 6d Hodder] 39-2492

"The story deals with a small group of characters, chiefly members of the old Austrian aristocracy living within comparatively easy reach of Vienna. The two people with whom we are mainly concerned are Count Carlo Herzogenbusch and his wife Maria Antonie. . . This study of the rather unhappy relations between husband and wife provides a developing narrative theme, but the true crisis arises from Carlo's slow realization of the hopelessness of Austria's plight and his final conviction that the adoption of National-Socialism and an alliance with Germany, was the single hope of his country's salvation." Times [London] Lit Sup

"The story seems awkward and not perfectly integrated in its translation. But it is unusual. It is poised, sensitive, clever—at its best. The upshot is still hopelessness. There are humor and gentleness here. But the ending has all the old, old sophistry of our own Indian summer." F. T. Marsh

"However important may be the book's political side it is far outshone by its literary quality, which is outstanding. In dialogue, structure, tempo, atmosphere and human interest this is a novel notably above the ordinary. . . It is brimful of life, of understanding and broad sympathy; and it has an individual charm due to the delicately permeating nostalgic love of Juliana von Stockhausen for the land in which she, a German of very old Westphalian lineage, made her home after marriage, until banished from it some years prior to the absorption of Austria in Hitler's 'Greater Germany.'" She has made use of a large quantity of hitherto unpublished manuscript material, has delved into the files of rare newspapers, and quotes from a large quantity of Irish and English publications, many of them obscure and hard to come by. Autobiography of an English doctor, who is also a gardener. Coming to London from a northern industrial town, he settled in a suburb, and had but eight shillings to spare for his first garden. Today, his garden on the fringe of Epping Forest is composed of several acres, in which he cultivates plants from all over the world.

"Infinite, leisurely, witty garden information. The line drawings by H. A. Thomerson are charming. The doctor, by the way, goes all out for bamboo hedges and Mr. Wyman doesn't list them. With an artistry that has grown notably since he was last heard from, he again establishes that men are rats, each in his own way. . . All this is set forth by Mr. Storm so succinctly and incisively, with such finished craftsmanship and such acrid irony, that it eats into the reader's consciousness and becomes lodged there. As a long short-story, it is an excellent piece of work, but it leaves this world we have to live in a badly shriveled and diminished planet." L. J. Halle, Jr.

After reading his lucid and passionate arguments, it is impossible to deny that his proposed union would be the most efficient method of creating a world-government, of preventing further aggressions by the autocracies, and of establishing permanent peace. It would be far more efficient than the most efficient League. . . But here we come to the 10 per cent. debatable ground. . . The psychology of nationalism is as vital a factor in the situation making for war as the machinery of the League or the futilities of isolationism. . . "Mr. Strong's imaginative motive, which discovers in the incapacity for life that springs from a too facile and egoistic fancy something of the disease of civilization, has point and subtlety. This, in fact, should have been a telling work of fiction. It turns out to be less than that. There are excellent things in it. . . But besides other things that provoke the scepticism lying in wait for every deliberate romanticist, there is also a want of hard inner clarity. The core of emotion in the story is a little too flabby, its vision too synthetic and misty to give unity to the whole. . . There is comedy in the novel as well as thoughtful irony, but both are a little flattened in the prevailing emotional haze. The best thing of all is the beautifully clear and sensitive portrait of Father Morrissey, in whom wisdom comes by the light of experience and philosophy rather than of nature or of Freud. It is character-drawing of this degree of insight that above all else makes for a good novel."

STURZO, LUIGI. Church and state [tr. by Barbara Barclay Carter]. 584p $5 Longmans [21s Bles]

261.7 Church and state

"In this study Church and State are taken in their widest sense as the spiritual and temporal, the two social forms that in their interplay polarise all the forces of human society. . . The book is divided into three parts. The first deals with the emergence and dominance of the Christian Church up to the breakdown of World Christendom which followed the collapse of the mediæval ideal of universal Empire and the 'Babylonish Captivity' of the Popes. The second stretches from the dawn of Humanism and the birth of the national State to the Enlightenment of the 18th century. The

STURZO, LUIGI—*Continued*
third carries the story from the French Revolution to the present day." (Publisher's note) Index.

"It is a penetrating study of political creeds and their underlying philosophies. . . Unfortunately, at times, in the telling of his story, Don Sturzo allows his own predilections to color slightly his objectivity. Throughout he is a trifle too harsh towards Catholics who in their conservatism fought the advance of more liberal principles. . . Church and State is a stimulating book. Covering as it does the whole Christian era, evaluating every movement of value in that era, tracing the line of progress in revolution, it is bound to invite criticism, disagreement, discussion. Otherwise it would not be the masterly fundamental work it is. Through it Don Sturzo takes his place as one of the world's outstanding historians, sociologists, scholars of political science." J. P. Delaney

\+ — America 62:245 D 9 '39 700w

"It is regrettable that so good a book should be marred by faults of some importance. One should not mind the fact that the writing often has a somewhat exotic tinge, were it not for the circumstance that some passages lack clarity and definiteness as a result of the way in which words are employed. It is also no wonder that Don Sturzo should lack familiarity with conditions in the United States and therefore occasionally strike a false note; but one wishes that an American scholar had been invited to review the volume before it was published." "The book is rather too long and the judgments on men and movements are sometimes rather too facile, but Don Sturzo has a firm grasp of historical principles and as a trained student of jurisprudence and theology, can expound clearly and draw out the implications of the endless, and frequently the recurring, attempts to define the relations between the two powers. . . His book can be recommended as a good and reliable guide to a problem which in our own day has again become the greatest of all problems." F. M. Powicke

\+ Manchester Guardian p3 N 10 '39 490w

"Don Sturzo's Church and State is a work of high scholarship, showing both mastery of a mass of historical detail and capacity to grasp and express the unity and continuity of the social process as a whole. His centre of reference throughout is the Papacy, and anyone who might be inclined to regard this as evidence of bias should remember that the Papacy is the one institution which has had a continuous existence through all the transformations of European society. Don Sturzo maintains a high standard of scholarly objectivity in his treatment of the Papacy in spite of his strong religious sympathies. To read his work is to understand the Catholic outlook upon the social problem, and the line of action to which the Catholic Church is committed by its tradition." John Macmurray

Even so, as a record of desperate courage, hardship and sheer adventure, it leaves little to be desired. "The majority of [textbooks on the history of civilization] have been rather voluminous, and there has been a need for a brief and clear work better adapted for the use of freshmen and of teachers' colleges. Professor Swain has filled this gap very effectively. His book is truly a history of civilization in content as well as in title. . . The space is well distributed, decent attention being given to the developments since 1800. The author has made use of the best secondary books in the field, and his bibliographies are full and well chosen. The style is clear and the point of view intelligent and liberal. "It is very doubtful whether a survey of this ambitious scope, even of the most elementary character, can be undertaken at the present time by any but a syndicate of experts. Prof. Swain is not unconscious of the difficulty; but his equipment for the task he has so boldly undertaken is open to question. Much of his work reads like notes for lectures to students, who may be expected or required to supplement them by more extended study. For the reading public the treatment is too factual and, notwithstanding the evaluating summaries, too little concerned with the broader aspects of trends and movements in development. This, however, is a matter of method and treatment on which opinion may differ; but in other respects, the book shows serious defects."

"The voluminous Wailes papers, including a regularly kept diary, 1852-62, proved to be a storehouse of information. Footnotes and bibliography indicate that Professor Sydnor meticulously searched both printed and manuscript sources for pertinent data. Errors in fact and typography are too few to warrant emphasis. The narrative is never dull; at times it sparkles with humor. Maps, illustrations, and an adequate index enhance the utility of the volume. In only one respect does the study seem inadequate: the agricultural and horticultural development of the Natchez region receive only meager attention, and Wailes as a Southern planter does not stand out in bold relief." TABEAU, PIERRE ANTOINE (supposed author). Narrative of Loisel's expedition to the upper Missouri; ed. by Annie Heloise Abel; tr. from the French by Rose Abel Wright. 272p il $3.50 Univ. of Okla. press

917.7 Missouri river. Indians of North America 39-19289

Tabeau, a French-Canadian voyageur, was a contemporary of Lewis and Clark. For almost two years he lived among the Arikara Indians, while he was in the employ of Loisel, a St Louis merchant. This, his hitherto unpublished diary, gives a picture of the Indian life and of the frontier life of the time. Index.

"The manuscript of the Narrative . . . has been admirably prepared for publication. The translation is excellent, while every portion of the document has been made the subject of elaborate scrutiny and careful comparison with other sources. The running commentary in the footnotes is thus exhaustive and highly illuminating, while the explanatory introduction is in itself a historical essay of no mean proportions. The editor deserves commendation for the range of her historical insight upon the subject at hand." A. H. Kelly

951 Chinese-Japanese war, 1931—Personal narratives 39-27544

Said to be a best-seller in Japan, this is the personal narrative of a Japanese soldier in the Sino-Japanese war. The book is in two parts; part one, Earth and soldiers, describes the writer's departure from Japan, and his participation in the Hangchow campaign. Part two is a condensed version of Wheat and soldiers which tells of the author's adventure near Suchow.

"One who can read between the lines, with a knowledge of the jingoism to which the Japanese—and particularly the soldiers—are subjected by their militaristic leaders, will find here the pathetic record of a sensitive man trying to relate the horrible realities of war to the doctrine that it is noble to die for the Emperor." It may be that years after the present war of conquest in the Far East is over Hino's book will arouse in Western readers some of the sympathy it would like now to create. Remarque, after all, did not publish his book until a decade after the World War. But in Japan a half million copies of 'Wheat and Soldiers' were sold a few months after publication. Read it. Then re-read Remarque, and ask yourself whether the Germans would have allowed the book to appear at all in the spring of 1918." Ann Springer

"As a human document this book deserves all the praise that has been heaped upon it. It is straightforward, simple, sincere, and absorbing. . . Although the book is undoubtedly honest so far as it goes, it is notable for its omissions. There is no mention of the brutalities which followed Japanese victories in the principal cities of China. Nor is any light shed on the quality of mind and character of the Japanese which would allow such things to happen. For balance, therefore, it should be read at the same time as Timperley's 'What War Means,' or some of the other first-hand accounts of the sacking of Nanking."

But in what it actually presents it is complex and terrifying. For through this one little corporal, through what he sees and thinks and feels, in his capacity to pity and suffer and endure, and yet to go on doing what he thinks is his duty, and to go on doing it with the very combination of blind devotion and poetry which is his being, we see the Japanese, the most formidable people on the earth." "The Japanese authorities did well to allow this book to become a best seller. If it stirs even the foreigner's pulse, how much more deeply it must move the Japanese people. . . The brutality and filth is there, but it is somehow transfigured, so that it blends into a stirring appeal to the nation. And the book will have no evil effects on the American public, unless the reader is able to jerk himself out of its spell. For it sheds a new light on the role of the Japanese army in China. As Corporal Ashihei Hino tells the story, the airplanes do not crash their bombs into the helpless civilians of crowded Chinese cities; they come as messengers of relief to beleaguered troops. Chinese women and children are protected, and prisoners of war—except in one instance, where three are executed—are well treated. Retelling of the Biblical story of Jonah, presenting him as an insignificant little man with an ambition to get on in the world. He was a humble cake seller in Tyre when the Voice came to him and bade him to go to Nineveh and become a prophet. His adventure with the whale and the course of his life in Nineveh is traced up to the time of King Sennacherib.

"A witty, subtle and most original novel. . . Beneath all his light-hearted anachronism, Mr. Tandrup possesses unusual historical perception; and his pictures of the teeming, fecund Tyrian slums, or his vivid vignette of King Sargon seated on a cushion in his enormous throne-room while crawling courtiers praise his imaginary military exploits, are beautifully right in feeling if perhaps unfounded in fact. He writes, too, with a sensitive, self-deprecatory humour that makes his asides at least inoffensive; and suggests his satire without hammering it home." John Mair

"This is a humorous novel. The religious press of the author's native country is said to have wondered as to whether it was an irreverent one, but it seems to have given Mr. Tandrup the benefit of the doubt, even as we should. . . From the moment the whale disgorges Jonah onto land, and the prophet, unable to get around that insistent Voice, advances toward Nineveh, the tale assumes the atmosphere and adventurous spirit of an Arabian Nights' entertainment, as a result of which the author and the reader have a lot of fun, and poor Jonah alone does not share in it." "The story of the massacre is pure horror, and capable of making the reader very sick to his stomach. But this is the only really tragic note in the book. TAYLOR, ALAN JOHN PERCIVALE. Germany's first bid for colonies, 1884-1885; a move in Bismarck's European policy. 103p $2.75 (7s 6d) Macmillan

325.343 Germany—Colonies. Germany—Foreign relations. Europe—Politics. Bismarck, Otto, fürst von [38-11975]

"Mr. Taylor attempts to find the key to Bismarck's colonial ambitions in the diplomatic circumstances of the time; his thesis is that Bismarck adopted a colonial policy not because he desired colonies as such, nor even because of the pressure of German public opinion, but solely because he wanted to provoke a quarrel with England (for which the colonial question would be an excuse) and thereby achieve a diplomatic understanding with France." "The thesis has certain merits, and Mr. Taylor has argued it with a good deal of ingenuity, giving an able analysis of the Anglo-German colonial negotiations and comparing Bismarck's parallel overtures to France. The trouble is that he has overstated his case. . . It is to be regretted that Mr. Taylor has quoted from only one set of unpublished records, the English. He has, of course, used the German published documents, but these omit much material that is of the first importance for so detailed a study. Within these limitations, this is an able book, and scholars who cannot agree with its main thesis will yet find in it much of interest and value." W. O. A.

"This latest volume in the excellent series of Studies in Modern History, edited by Professor Namier, is a model of the way in which diplomatic history should be written. Mr. Taylor goes to the right sources, examines them carefully, and explains the story told by them. He adds enough comment to enable the reader to put this story in its general setting, and also to understand the personal and contingent factors in the negotiations. His introduction is a brilliant little summary of the German attitude towards colonies in general, and British colonies in particular. He writes clearly, and is always master of his subject. The subject itself is of great interest, and relevant to the present time. . . To a certain extent, perhaps, Mr. Taylor overstates the case." E. L. Woodward

331.0973 Labor and laboring classes—U.S. Labor laws and legislation—U.S. 38-32570

"Dr. Taylor's treatise, with its emphasis upon labor law, discusses: (1) the nature and origins of labor problems; (2) the history and objectives of organized labor; (3) the legal background of the labor movement; (4) the social and legal phases of labor problems; (5) the role of government in industrial disputes; and (6) the approach of the employer to labor problems." (Ann Am Acad) Indexes.

"While on some subjects strictly up to date, this volume almost completely ignores the developments of the New-Deal period in the treatment of other subjects, among these, the legal position of the labor unions, to which the author devotes several chapters. . . The style is readable and the treatment direct and simple. While presenting little that is original, the author has read most of the books in the field and abstracts reasonably well the information they give. Interesting is the emphasis upon labor legislation and court decisions, which the reviewer regards as proper in view of the increasing rôle of government in labor relations. Not a book for the specialist, this new textbook in labor problems is worthy of consideration for single semester courses in this field." E. E. Witte

The other four papers are, however, of sufficiently recent composition to fall into alignment with its argument without artificiality. The whole series, therefore, forms an attractive picture of the philosophical faith of a mature mind whose researches in other fields —notably the historical field—have cooperated with a deeply receptive personality to conduct the writer to a serene and equably tempered metaphysical insight."

"The documents relate to the years of the French Revolution to 1902. They include extracts from speeches and dispatches written by every British Foreign Secretary during these years, including the younger Pitt, Canning, Castlereagh, Palmerston, the Duke of Wellington, Peel, Gladstone, Disraeli, and Lord Salisbury. All of the citations deal with events and problems which have played a part in molding the Europe of today. Many of them contain lessons which statesmen of today might usefully ponder. These documents, with few exceptions, are the work of experts." Christian Science Monitor

"Professors Temperley and Penson have done more than to assemble a valuable collection of documents illustrating the policies of nineteenth century foreign secretaries; they have also brought out in their excellent introductions to each section the extent to which these policies reflected a common political outlook. Even in itself, the publication of nearly two hundred documents, including many drawn from official archives and private papers and appearing in print for the first time, is a distinctive service." (W) [38-12958]

A novel based on the true story of Peter, the wild boy discovered in the forests of Germany in 1725 and brought to England by George I.

"The book is so compactly written that it requires close attention. It is to be read word by word rather than sentence by sentence, and a second reading will bring it into sharper outline. But its difficulty is not the result of inarticulateness, but of the author's refusal to spare either [herself] or the reader in getting at the roots of a tale that asked to be done perfectly or not at all. The old theme of man's relation to nature is treated with delightful freshness." N. W. Richmond, Jr.

327.73 U.S.—Foreign relations. U.S.—Neutrality. European war, 1939- (W) 39-32831

"The authors argue: that this is not our war but the war of rival European imperialisms; that the effects of our going in would be disastrous; and that we do not need to go in, but will find it difficult to keep out if we try only to 'stay half out.' The program recommended as best adapted to keeping us out contains such items as these: curb the power of the executive; have a referendum before a declaration of war; allow youths over eighteen to vote on war; restore and extend arms embargo; rigidly enforce cash-and-carry provisions; impose heavy tax on war profits; reduce army and navy budgets." "This book contains some first-class writing. The best is in Miss Thompson's first and last chapters, which were not columns. The first is her introduction, a masterful statement of her personal principles. The final chapter is a speech on America, a deeply moving lyric. Another speech, a toast to Thomas Mann, is of the first water of literary craftsmanship. But that is not to say that her off-the-anvil journalism is not good writing. It has body and texture, clarity and feeling. It is good writing because it conveys its meaning smoothly and directly, which is the hall-mark of good prose." R. G. Swing

THOMPSON, FLORA. Lark Rise [drawings by Lynton Lamb]. 288p $3.50 (8s 6d) Oxford

914.2 Country life—England. England—Social life and customs [39-25940]

Reminiscences of life in a tiny Oxfordshire hamlet in the 1880s. As the author was the daughter of the village stone mason and her mother had been better brought up than many of the village women, the life in their little cottage was not quite so dreary as in other cottages. But the recollections cover all seasons of the year and all types of life in Lark Rise.

"An account of life among humble agricultural laborers on the English countryside in the 1880s would ordinarily be a contribution to sociology or that other 'dismal science,' economics. But Miss Thompson's vivid memory and ability to recreate the past have made it an attractive piece of general literature and her charming picture of the remote Oxfordshire hamlet in which she spent her childhood lingers pleasantly in the mind long after reading." 025.3 Cataloging. Libraries, Special 39-11756

Survey of the cataloging methods used in special libraries of various types in Great Britain—government, university, learned society, commercial, technical, and school, with examples for meeting their special difficulties. The author is assistant librarian of St Bartholomew's hospital. Index.

"This book will interest all librarians who have charge of special collections. . . Mr. Thornton's comments are shrewd and at times outspoken. He does not, happily, belong to the school which aims at transforming librarianship from a useful art to an arcane science. His style is clear, concise and free from jargon, and he keeps the library user always in the foreground. The book is illustrated with specimen card and other catalogue entries. Except for some minor details, it is well produced and printed." B. S.

Biographical novel telling the story of Charles and Mary Lamb.

"It is Charles Lamb himself who makes the novel, and gives it a novel's human value and vividness. 'Gentle-hearted Charles,' Coleridge called him, a friend, they said, to every one but himself. "I must confess that I did not find Miss Cook very well qualified for such an ambitious task as the bringing to life of this famous and fascinating society. She does her best with Lamb, though the portrait of him is flat if only by reason of its familiarity, but she has no particular gift either for caricaturing her figures (as Dickens caricatured Leigh Hunt in the person of Horace Skimpole) or for giving them new life. The book contains quite a small anthology of verse from Lamb and the Lake Poets, but the reported conversations have little significance." J. D. Beresford
— Manchester Guardian p7 F 17 '39 270w

" 'Justly Dear' is very far indeed from being a gloomy book, in spite of the recurring shadow which again and again falls over the brother and sister. Mrs. Cook has for the most part treated her subject objectively. We see Charles and Mary Lamb as their friends saw them, know them as their friends knew them. Only very occasionally does the author venture on any attempt to depict what went on in the mind of Charles, and these attempts prove well justified." L. M. Field

THORP, WILLARD LONG, ed. Economic problems in a changing world, by Edward Berman [and others]. 820p maps $5; college ed $3.75 Farrar

330.973 U.S.—Economic conditions. U.S.—Economic policy 39-3440

"This book endeavors to present and evaluate the current state of our actual functioning at certain critical points in the economic system. It does not deny the existence of principles, or of technical and human conditions which define the possible limits of development. It concerns itself primarily with existing differences between the actual and the ideal, and the direction of present or possible future developments." (Foreword) The book is a symposium, various chapters or whole sections being written by various hands. Contents: Economic problems in a changing world, by W. L. Thorp; Some consumer problems, by C. D. Edwards; Some price problems, by T. J. Kreps; Some management problems, by C. L. Jamison and O. W. Blackett; Some labor problems, by Edward Berman; Some capital problems, by F. C. James; Some government problems, by A. E. Burns and D. S. Watson; Some problems of conflict, by R. S. Winslow.

"The book does not pretend to deal with all of the problems of our current economy, or to treat exhaustively those which are discussed. Nevertheless, it is, on the whole, an excellent book. With the possible exception of one section (problems of conflict), which attempts a dubious sociological analysis of economic phenomena, the analysis is sound and complete. In view of the diversity of authorship, there is surprising uniformity in point of view and method of attack." G. S. Watkins

" 'Economic Problems in a Changing World' is 'dedicated to the proposition that our economic system is behaving rather badly.' This proposition is one which has been enunciated for many years by those whom society has chosen to designate 'radicals.' That a number of the nation's leading liberal economists have recognized the validity of the proposition and have written so ably and extensively about it indicates that there is developing a new approach, a new spirit of analysis, a new utilization of empiricism which is gradually changing and may revolutionize the study of economics. The value of this book in crystallizing this new spirit is exceeded only by its value in clarifying for the intelligent and observant reader many of the economic phenomena which appear to be strangling our present order into a rapidly approaching coma." THORPE, LOUIS PETER. Psychological foundations of personality; a guide for students and teachers. 602p il $3.50 (21s) McGraw

137 Personality 38-31604

"Professor Thorpe presents a clear and systematic analysis of the concept of personality and discusses its biological and psychological foundations. He selects sound psychological constructs and views them organismically. He gathers quantities of relevant research material from numerous studies in various fields. He then proceeds to integrate this vast amount of material to present a comprehensive version of the modern concept of the dynamic human personality. The result is a version which rests upon the principles and facts of genetic psychology." (Survey) Indexes.

"The author of Psychological Foundations of Personality, being a professor of education as well as a practical therapist, is quite naturally interested in the 'educability of personality;' and his book is advertised as a 'handbook on the craft of inspired and purposive teaching.' But there is no evidence that Professor Thorpe believes that 'inspired' education and therapy must necessarily be based upon a philosophy, or system of values: matters which are still outside the province of objective scientific psychology. . . Perhaps the grievous mental ills of which he complains today are manageable. But only an irreclaimable optimist will believe that he can be fathomed by the unrelated categories or cured by the shotgun prescriptions which constitute this book." H. A. Murray

Tillyard, are well known as two of England's most distinguished, most urbane scholars. Their debate concerning the relation of an author's work to his 'personality' was not prearranged, but developed from an article written by Mr. Lewis in 1934. The authors have wisely collected the six essays of this fruitful discussion in a single volume." Boston Transcript

"Perhaps the most fascinating chapter in a fascinating book is the one which deals with the reviews contributed to it during these forty years. Some are to-day unintentionally amusing—Scott's poems would probably endure, and Byron's possibly, but Shelley and Wordsworth were, in the phrase of an old English poem, 'as dead as a door-nail, to deem the sooth.' Other reviews are remarkable for their keen perception, and would, I think, repay reprinting." E. E. Kellett

TINDALL, WILLIAM YORK. D. H. Lawrence and Susan his cow. 231p $2.75 Columbia univ. press
B or 92 Lawrence, David Herbert
39-30216

"If [this] is the most thorough study of Lawrence's writings that has yet appeared, it is also the most stimulating. The invocation of the black cow from Lawrence's ranch near Taos was a clever device: Lawrence felt a mystic relatedness between Susan and himself, and although she never became his most important symbol, she provides this book with a convenient starting point. . . Lawrence's ideas are traced to their sources, and the books that moved him most are discussed in relation to the development of his philosophy. . . Professor Tindall also attempts to place Lawrence in the pattern of his age. The chapter 'D. H. Lawrence among the Fascists' deals cautiously and at some length with one of the most perplexing Lawrencean riddles." (Sat R of Lit) Bibliography. Index.

" 'D. H. Lawrence and Susan His Cow' is uneasy writing, often clever but at times too hellbent in pursuit of cleverness. But one phrase at the end is so apt that much could be forgiven Mr Tindall, much more than is necessary. Recognizing that it was Lawrence's tone, rather than his ideas, which made him appreciated, the author [says] . . . 'He was a Father Divine for the literate.' " Lorine Pruette

"As literary detective work, this is very fine; as criticism, however, it is nothing. . . Two things in this book—the scholarship and the wit—need especial comment. The book is sound

in its approach to sources, but all the atmosphere of scholarship springing from multitudinous footnotes, careful index, satisfactory bibliography and flawless proof-reading, cannot turn eccentrics, scorned on the one hand, into reliable agents of information on the other. . . Of Professor Tindall's very active wit one can say pleasanter things; for his book is almost always amusing, sometimes vastly so, and only the incurable Laurentian will think otherwise." TODD, RUTHVEN. Over the mountain. 273p $2.50 Knopf [7s 6d Harrap]

39-6475

An allegorical tale. Michael, the son of a clergyman, living in an unnamed country, spends his youth yearning to climb the Peak, a mountain which has never been conquered. While still a very young man he achieves his dream. After incredible hardships he succeeds in climbing the mountain, and descends into the unknown country on the other side. To his surprise it is a land much like his own, fascistic in tendency. He is first lionized, then exploited, and finally is glad to escape and reclimb the Peak and return to his own land.

"Mr. Todd writes with vigor and under his own power, but it seems wise to wait for the next novel before risking any judgment as to his possibilities." N. W. Richardson, Jr.

660 Chemical engineering

"Stress on structural details rather than basic design gives this English manual a character different from that in most American handbooks. Almost half the book, including chapter headings such as metals, stoneware, pressure vessels, pipes, fittings, and insulation, emphasizes structure. Discussions of fluid flow, heat transmission, and diffusional processes are sketchy and, although unit operations are treated in more detail, the data are not sufficient to help the designer materially." (Ind & Eng Chem) Indexes.

"A large part of the value of this book lies in the fact that there is put into one volume both the theoretical aspects of the various chemical engineering operations as well as the practical handling of these problems. . . The author himself stresses in the preface that the whole field of chemical engineering is too vast to cover in one volume and, therefore, he has selected the most important aspects endeavoring to give those phases selected the most practical treatment possible. "Professor Torrey's thoroughly excellent little work is a labor of correction, and one that should be consulted and pondered by all who dislike the easy generalizations that becloud a reputation and often tarnish the creative vigor behind it. Here is a Voltaire who by his sensibility and even profound passion destroys the thin-lipped Satan of immemorial reputation."

917.4 New England—Description and travel (W) 39-14034

Random recollections of an automobile trip thru the New England states. Starting from New York in August, the author and a friend drove some 3000 miles, visiting each of the states, viewing historical sites, and being invited to stop with friends. Very little factual information is contained in the book, altho some idea of places to stop for good meals is given.

"To readers unacquainted with this American Arcadia Mr. Towne's book may be warmly commended. Seeing New England vicariously through his kindly, understanding eyes, they will find its natural beauties, celebrated shrines, quaint survivals and friendly modern people described in a style and mood wholly suited to the subject matter. Often, indeed, one is reminded of those English masters of the art of evoking the souls of places and the spirit of the past, Charles Lamb and E. V. Lucas. Unhesitatingly I place 'Jogging Around New England' on the 'must' list not only for the approaching summer season but also for next winter's fireside reading." W. N. C. Carlton

"With historical and literary associations, scenic beauty, and human nature lying all round to give substance and grace to a book that bears the alluring title, 'Jogging Around New England,' Charles Hanson Towne has contented himself with describing the more obvious aspects of his material, and even so, not always accurately. . . If the book is to be a guide book, it should be accurate; if it is to be a book of travel essays, Mr. Towne has already, by a long succession of writings, trained the reader to expect a larger measure of charm."

Story of inter-racial hatred as evidenced in the case of two sea captains: Captain Leggatt, an Englishman, and Captain Moeller, a German. The two men hate each other, and all that each stands for. Then the English ship rescues the crew of the German ship during a storm. After that the two men talk over their difficulties and part with respect.

Booklist 36:198 Ja 15 '40

"This is a superior tale in many of its parts, it seems to me, occasionally a distinguished one. For the sake of the whole, by way of story telling, Mr. Townend has resorted to stock and done a bang-up melodrama not without benefit of hokum. But this is also intelligent and serious and pretty keen. . . Add that the tale is consistently and beautifully readable." F. T. Marsh

"This is all just a bit too pat. It is a game of tit-tat-toe, with the hero (the author is partial to the English) winning. The lines of the plot cross with perfect regularity, and everybody has several turns because each has a double role to play. . . What is far and away the best feature of this novel is not its characterization, its moral, or the lively and interesting discussions of current problems. It is the good old tang of the sea, the talk and the feel of ships, the understanding of the role played by England's merchant service." Olga Owens

As for Moeller, he is merely the bully, before and after treatment. We may sympathize with the German, but never like him: the portrait is too crude. "Because Will Rogers could get $10,000 and up a week for playing a character part is no sign that his relatives can get away with the same part, and this book's bland assumption that kinship justifies all is mildly irritating. . . Mr. Trent's own contribution is limited to eulogy, to flattery so unadulterated by common sense as to be embarrassing. While it may be accepted that his motivation was sincere, that he truly felt that he had something of value to add to the Rogers legend, it is necessary to report regretfully that his effort to make a valuable addition has not been successful." Intended as a parody on one of 1938's best sellers, With Malice Toward Some (Book Review Digest, 1938). In this book the United States is shown up instead of England.

"Let the wise reader not be misled by Mr. Tressler's title. 'With Malice Toward All' is no proper riposte to Miss Halsey's inhumanely witty diatribe against the hardening English social arteries. I doubt that Mr. Tressler originally had any such *tu quoque* in mind. Rather, I suspect that the title was chosen as a clever catch-sales afterthought." F. H. Britten

"It is quite possible that you may find it very amusing indeed. The reviewer tried it on one friend whose eyes immediately ran tears of mirth, and on another who merely smiled with pallid courtesy; the reviewer's own response lies somewhat on the pallid side, and the reviewer's judgment is that the book is nothing to write away from home about. But if you've done this kind of traveling you may get a lot of fun out of these fantastic archives."

"Whereas Miss Halsey was fortunate enough to be genuinely surprised at what she saw, Mr. Tressler is writing about his own country, and though he seems to be exploring the South for the first time, he cannot fail to be familiar with a great many things common to all sections of the United States. Thus to be funny in Miss Halsey's manner, he must either write really profound satire like that of Swift or Butler, or else close his eyes to the implications of what he sees. The truth, we suspect, is that when Mr. Tressler came to examine his subject, he didn't think it was so awfully funny. Mostly he was bored, so that the reader senses his strain rather than his mirth." K. S.

In this chronicle, as in other spy records of fact or fabrications of fiction, the reader is constantly surprised by the combination of the fantastic and the apparently silly in the spy's assignments and risks, and in the way spies are recruited and put to work. It is really small wonder that the public shrugs and says, 'So what?' But these things are true. And, of course, they are dangerous. They are recounted here in gripping detail."

Told in a style whose Oppenheim slickness we presumably owe to Mr. Wittels, the fantastic tale moves with the speed of a well-directed film. As in a film, speed sometimes makes it difficult to follow the ins-and-outs of the plot, but that is probably due to the professional imbecility of spies."

Historical background is considered, and more recent cases stated and examined. The latter part of the book takes up philosophical, psychological, and religious aspects. Index.

"Mr. Tyrrell strives to correlate his conclusions with religion. His notion of religion is too hazy for a satisfactory judgment on the problem. Both the author and his readers will find a more profound and luminous treatment of that problem in 'The Church and Spiritualism' by the English Jesuit, Herbert Thurston. "What gives unity to this collection of essays by Sigrid Undset is the intellectual assurance, the strength and flexibility of her defence of Catholic doctrine. Hers might be described as, in one sense, a masculine intelligence, so firm is her grasp of abstract principle through all discussion of the concrete. . . To a reader unversed in the theological complexities of our day her dogmatic standpoint may sometimes seem a little ambiguous, but the truth is that her Catholicism emphasizes the empirical rather than the dogmatic side of religion. A principal reason for this is that the novelist's intelligence, which is feminine and is apparent in all Sigrid Undset's critical writings, almost always favours the particular as against the universal."

B or 92 Heinrich, Anthony Philip 39-2473

The subject of this biography was born in Bohemia in 1781, of a well-to-do family. Of a wandering, adventurous spirit he migrated to America early in the nineteenth century, where first as an amateur, later as a professional, he entered into the musical life of the country as an orchestra conductor and a composer. This biography combines the story of his life and a picture of the manners and customs of the time, with some account of his achievements as a musician. Bibliography. Index.

"Here is the case of a man who a century ago held a dominant position in music in this country and who today is absolutely forgotten except by students of a period. Yet at one time he was well enough known to be termed affectionately 'Father Heinrich' and to be dubbed by admirers 'the Beethoven of America.' Mr. Upton in his thorough and detailed treatise brings this singular personage back to memory and at the same time sets before the reader a great deal of information about music in the United States for several decades previous to 1861." "Apart from its primary value as an adventure story the greatest worth of the book to those who are trying to understand the Far Eastern situation is probably to be found in the evidence which Miss Utley produces to show why it is that, although the Chinese soldiery have shown a capacity for stopping Japan's better-equipped forces . . . The book is alive with personal experience and observation. . . I think the most valid criticism that could be offered of the book is a tendency to underrate Japan's strength, both economic and moral. The last adjective is used not, of course, in any ethical sense, but in the connotation of national unity, determination, willingness to undergo great sacrifices." W. H. C.

It is not merely an imaginative reconstruction, seen through the author's temperament; it has the air of science. One is therefore tempted to quarrel on points which would not in an ordinary biography seem objectionable. So, for instance, it seems to me that though the authoress is justified in emphasising Leonardo's dislike of the abstract speculations of the neo-Platonists, she is wrong in including all Humanists in the group of which he disapproved. . . A German actress, for many years a resident in America, returns to Nazi Germany on a business matter, gets into trouble with the authorities, is given a secret trial and condemned to death. "The tale of a boy who tries to get his mother out of a German prison camp, the destinies of a handful of unimportant people who, through this, are swept into the machinery of current international politics is as exciting as melodrama. Miss Vance makes it a good deal more. Her story is one of fast-moving events and unbearable suspense, but it takes place on contrasting levels—in the world of action and in the world of the imagination, too. Her plot unfolds in the most tantalizing and breath-taking fashion, but it moves one doubly because it concerns normal people rather than the stock figures of adventure, and they are opposed in a very real and immediate crisis. This gives the whole book a peculiarly haunting quality which continues to be disturbing even after the last page has been turned." Iris Barry

598.2 Birds—Juvenile literature. Photography of birds 39-20136

"A page every week, a column every day, Mr. Van Coevering as wild-life editor of 'The Detroit Free Press' has been leading boys and girls on nature-study expeditions since 1931; thousands of them have written to him; this book is the result. Each chapter is built around a bird and a child; he hears spring come in, high in air, with the Canada geese, or visits a bird sanctuary and takes pictures of family life, or gets inside a heronry, or watches at the nest of a horned lark, or builds a 'blind' to hide behind, not to shoot but to see." "This autobiography may be read either as an account of spiritual and intellectual adventure amid the chaos of Europe and Africa or as another book by a foreign correspondent. As the former, it is extraordinary. . . Mr. Van Paassen's sympathies are never in doubt, even if his facts are not always straight. And many of the individual personal experiences which he reports are truly illuminating. . . Ten years ago, or perhaps even five, a writer who suggested that Christianity could again become a militant political force would not have been listened to. The German Führer has revived that hope. Hence, for all its inaccuracies, Mr. Van Paassen's story is a valuable one. He is certain that 'Fascism carries in its bosom the seed of its own disintegration,' and hopeful that some cradle already holds the new Voltaire to combat the new 'infame.' " J. B. Phillips

His impressions, when they deal with manifest cruelty or injustice, are sharp and impassioned. And yet, there persists in the reader an uncomfortable feeling that the picture is not always whole. So much opportunity, so little sign of that capacity to probe and weigh which seems the sole excuse for journalism of any kind in this day of unrestrained moral indignation. Many stories bear the stigmata of exaggeration. This might not be so bad if the reader did not feel that these are made the chief basis for an attitude or a summing up." Carlton McNaught

A textbook for nonprofessional students of psychology. "The book strives for two objectives. First, it seeks to stress the practical and nontechnical phases of the subject. . . In the second place, it has been kept in mind that this is a textbook and that a textbook should be a source of essential factual material. This information does not involve extensive technical references or descriptions, but it does involve condensed and simple statements of such facts as are most widely accepted and used in the subject." (Pref) The author is a member of the department of psychology, Los Angeles Junior college. Indexes.

"The author attempts in this book to make psychology interesting and easy and he achieves some success in both goals but at the cost of a distorted and false view. The exposition depends largely upon secondary sources and the recommendations for further reading are chiefly to popular books. VEBLEN, T. B.—*Continued*
Like all monistic theories of history, Veblen's technological interpretation has serious shortcomings. The long-run trend is only a cumulation of short-run episodes, and though technological factors may limit the short-run, they do not necessarily pre-determine it. Biography and accident are part of history. But history must be more than biography and accident for else a book written a quarter of a century ago could not remain the best guide to the most terrifying country in Christendom." Eli Ginzberg

968.8 Africa, Southwest [39-303]

"In this volume Dr. Heinrich Vedder, to whom students of African history are already heavily in debt, tells the story of South West Africa from earliest times to 1890. He is chiefly concerned with the migrations and wars of the native tribes, mainly in the nineteenth century, though he includes the earliest contacts of European navigators with the country and the later explorations of the white man. The German occupation in 1884 is referred to but is not described in full." Am Hist R

"The style is simple, direct, unadorned. . . . The book has in it much of the quality that gives the Old Testament a significance transcending ancient Palestine. . . . Apart from its general sociological interest Vedder's book is to be recommended to those who think of Africa as a Garden of Eden until the white man entered it in the serpent's role. Among native Africans there was an imperialism as real in its results and as material in its purposes as that of the Europeans. This volume deserves credit for reminding us of this very important fact." H. R. Rudin

The author, a French ethnographer, spent seven months in 1936-37, living with a small group of nomadic Eskimos in their winter quarters on the east coast of Greenland. This book is a day-by-day record of his experiences and observations, character sketches of his companions, bits of legends they told him, descriptions of their daily occupations.

"One has the impression that Victor could have made something really fine of his splendid material, had he first taken a few years in which to assimilate and digest it. As it stands, the book suffers from being written too close to experience and in a jumbled, impressionistic style. It is too often a glittering mass of little gems, thrown in with much that is irrelevant —the whole perhaps being meant to represent life as it is lived, but succeeding only in representing it without that necessary, unifying effect of the recorder's selective point of view." "It may seem that the idyllic quality of 'Born of Woman' is a product of nostalgia. Yet the motivating nostalgia is emphatically not sophisticated or urban; it contains no irritating eulogy of the life it depicts, nor does it say, 'Let us go back to the good old times!' The nostalgia consists of a loving attempt to describe the innumerable aspects of the countryside and the seasons, and to correlate with them the author's scale of values. . . It is worth mention, too, since the book is a translation, that the English version follows the French closely but with discrimination, and is in general very good." I. W. Athey

VOITINSKII, VLADIMIR SAVEL'EVICH. Seasonal variations in employment in the United States; a report prepared for the Committee on social security [Social science research council]. 154p pa $1.50 Social science research council

331.137 Unemployment. Industries, Seasonal. Labor and laboring classes—U.S. 39-13309

"The outline of the present study is as follows: Problems of method are discussed in Chapter I. Seasonal rhythms in different industrial groups and individual industries are

VOITINSKII, V. S.—*Continued*
examined in Chapter II, and an attempt is made to express the rhythms in employment in the principal groups of manufacturing and non-manufacturing industries by indexes of seasonality in percentages of workers employed in each industry in the base period. These seasonal indexes are converted into absolute numbers in Chapter III and it is shown how the number of workers out of jobs because of slack seasons varies from month to month in different industrial divisions. A tentative 'Calendar of Employment in the United States' is presented in Chapter IV. The investigation of seasonal variations in employment is supplemented in Chapter V by a brief discussion of seasonal rhythm in hours of work. It is shown that some industries have considerable success in stabilizing their demand for labor throughout the year by seasonal adjustments of their work-hour schedules." Introd.

"All students of seasonal variations in the labor market and especially unemployment compensation and placement agencies will find valuable information in this book. It is aimed at stimulating similar studies of limited areas and of particular industries. This reviewer shares the author's view, saying that in those more specific studies attempts to set up seasonal factors changing from year to year will frequently prove indispensable. Such a procedure might be promising even for a major industrial group such as construction." Horst Mendershausen

+ Am Econ R 29:864 D '39 800w

"The general discussions contribute significantly to a more satisfactory analysis of seasonal variation. The author's theoretical analysis and justification of his method merit careful consideration aside from the question of its applicability to the administrative ends in view. Probably these ends, and especially the use of the method in local research, would be better served by simplification both of the method and of the author's analysis of its theoretical basis." "This latest edition of the Volume Library, which has gone through numerous partial revisions since its first appearance in 1911, represents a complete recasting and great expansion of the publication reviewed in the Subscription Books Bulletin, January, 1930 and April, 1934 [Book Review Digest, 1934]. The volume is intended for 'ready reference and home study.' It is divided into 16 main sections or 'books' under the headings: Education; Kindergarten; Language and grammar; Literature; Geography; History; Mathematics; Science; Physiology and hygiene; Government and law; Biography; Industry and trade; Multiplex dictionary; Fine arts; Useful miscellany; and Atlas. As in earlier editions, this information includes, besides general descriptive and expository material, many outlines, tables, and special dictionaries, such as the 'Dictionary of printers' terms,' 'Dictionary of given names,' 'Governmental and legal dictionary,' etc. The 'Multiplex dictionary' gives spelling, pronunciation and definition of words 'in most common use in English.' Stories, poems and songs with music are found in the Kindergarten section. Bibliographies are appended to each section." Subscription Bks Bul

"The Volume Library duplicates information which is usually given fuller treatment in the unabridged dictionaries and encyclopedias found in school and public libraries. It contains much, however, that should be of interest and usefulness for the home library where an inexpensive work of general reference is desired. It is recommended for this purpose."

"The book begins with a short survey of the existing situation and the development which led up to it. It ends with broad conclusions and a brief discussion of economic and international questions. In between it comprises an account of the natural conditions and the way in which each of the major land industries —wool, wheat, dairying, meat, sugar, fruit, irrigation, forestry—have adapted themselves to the conditions and turned land to use. While the material is organized primarily by industries, regional differences are well brought out, especially in the sections dealing with wool and wheat, which are the heart of the book." Pacific Affairs

"This book is a valuable addition to the rapidly expanding list of references in the field of land use. . . "The authors have given us an excellent summary of the various rural industries with respect to the quantity and quality of land used by each industry and the volume of production; but we learn very little about the people who live on the land. A geographer would like to find, for example, a discussion of population density and distribution in connection with types of land use or a discussion of the size of the farm enterprises in the various industries. The book is well illustrated with good photographs, maps, and graphs. A number of the maps, however, have been so reduced that they are unreadable; often we look in vain for scale. The footnotes are not complete, so that they do not take the place of a bibliography, the lack of which is regrettable." K. J. Pelzer

"It would be easy but pointless to criticize this book severely on the ground of omissions and deficiencies. It is so short, for so vast a subject as the land use of a continent, that many relevant topics are only touched on in passing or not covered at all. The authors were handicapped by want of data, and it may be said that even the data they collected are not adequately presented. A bibliography, better documentation, and tables to present accurately the data given only in charts which are none too easy to read, would have improved the book. But for the student who is interested in broad perspectives and penetrating discussion of the objectives and possibilities of policy these defects are unimportant in view of the merits of the work." 332.77 Foreign exchange. Finance—Great Britain. Money—Great Britain [40-2190]

"The Exchange Equalisation Account was established in the spring of 1932, after one of the major crises in the history of British finance. . . The Exchange Equalisation Account was designed as an instrument which by its power and resources would check exchange speculation, control the external value of sterling and insulate the domestic credit structure from disturbances generated in the outside world. . . Every step in the history of the operation of the Account, in so far as the veil of official secrecy has not concealed it, is described in detail in Mr. Waight's exhaustive monograph, which will prove of the greatest possible value to all students of economics or finance. The author's personal acquaintance with the foreign exchange market has enabled him to treat the subject realistically, and the appendix of recent British monetary legislation gives the reader access to the leading documents necessary for understanding the problems of the Account." (Times [London] Lit Sup) Index.

"The most evident shortcoming of the book is that the author has failed to consider the criticisms that have been raised against both the policy and tactics of the B.E.E.A. and thus gives the impression that it has been considerably more flawless than has actually been the case. "A task like this is an enormous undertaking, and Mr. Walker is to be congratulated on his success in constructing an orderly pattern out of the exuberant and confused life of those years. He is wise in stressing the '60's, which saw the maturer work of the more important writers he examines, just as he is shrewd in selecting his governing scheme, that of social history rather than a succession of biographical sketches. His method allows the reader to feel that he is something more than a detached observer, a part of the process itself, an enzyme in the brew. WALPOLE, HORACE, 4th earl of ORFORD. Correspondence with Madame du Deffand and Wiart; ed. by W. S. Lewis and Warren Hunting Smith. 6v il $45 Yale univ. press

B or 92 Du Deffand de La Lande, Marie Anne (de Vichy Chamrond) marquise. Wiart, Jean-François. Authors—Correspondence, reminiscences, etc.

These carefully edited volumes contain the letters of Mme du Deffand to her English friend Horace Walpole, over the period from 1766 to 1780. Almost all of Walpole's replies are missing, but the editors have done what they could to make up for this loss. Using evidence from Walpole's Paris Journal and Mme du Deffand's allusions in her letters, and from other sources, they have attempted to indicate the points at which Walpole's letters would be inserted if they were extant. Index in volume 6. For the first two volumes in this series see Book Review Digest, 1937.

The industry [of the editors] staggers the imagination, but even the casual reader may discover anywhere in the book delightful evidence of their taste and understanding. "Mr. Walsh's accomplishment deserves not only the applause of romance lovers, but the study of scholars. This certainly, is the best of Maurice Walsh's books to date, so good a book indeed that it transcends the classification of mere romance and bids fair to take a place among the greater historical novels written in English. Taking a theme worthy of Homer, the author has written pages of Homeric quality. There is epic spaciousness in his style, yet each man and woman moving through the great actions of the tale is individual and singular, and we see their actions spring at once from character and from the mores of their nascent civilization." "By placing the one-handed son of a swordmaker in the central legend, a hitherto insignificant appendage of the great story of Cuchulain has been focussed into full and splendid life and considerable importance. The narrative is rapid and brilliant; never scratches its keel on those shoals of cliché and bathos which wreck so many ships of romance; drives along under a sense of gathering tragic dooms to an end unforeseeable but inevitable. . . But only one of the sons is needed in the story proper, and the extra characters left on the author's hands are disposed by shunting them off into happily-ever-after domesticity, rather a disagreeable shock when he has been talking about high and glorious destinies. It also . . . leaves the net impression that Mr. Walsh is a fine romantic writer in the making, not yet capable of running the full length of a novel without fatigue, but one who will turn in some world records when he learns to go the distance." Foreword

"'Low Heaven' is an interesting character study of a man who hasn't much character, and a lively picture of modern Manila." Lisle Bell

+ Books p18 Mr 26 '39 200w

"The author is evidently familiar with the polyglot life of Manila. . . From Manila, the action moves on south to Zamboanga and thence to the farther reaches of those tiny islands largely inhabited by savage Moro tribesmen. The author, however, fails to take advantage of a background pretty much untouched in contemporary fiction and one is left strangely unsatisfied." R. A. C.

"Unpretentious, sincere, but unskilled novel. . . Mr. Walters spots dramatic situations ably, but is undone by the difficulty of putting drama into words. He knows what should be color, but cannot as yet present color vividly. His weakness as a novelist appears to be mainly a lack of technical skill, and as that is a weakness that can be mended, he seems a promising writer." Robert Van Gelder

WALTON, MRS BESSYE E. (BLOOM) (STERA BOSA, pseud). Lappy in the forest; il. by Glenna Latimer. 141p $2 Dutton

39-4383

Lappy, the young rabbit hero of Adventures of Lappy Cushion-Tail (Book Review Digest, 1936), ventures into the forest and learns who are his friends and foes there. His meeting with each of them forms the basis of a story from which young readers can learn the habits of the animal in question.

"These short stories are quiet but not without action; forest animals cannot afford to be without action. It all makes an informal introduction to natural history at an age when animals are still people to children; I could do without a couple of references to Mother Nature, but these are easily skipped. Just as a picture book it is charming." M. L. Becker

+ Books p12 My 7 '39 230w

"It is suitable to read to children of kindergarten and primary grades, or for third and fourth grade children to read for themselves. Many of the weaknesses of Thornton Burgess are here in the personification of the animals, and few of the characteristics which made the Burgess books so appealing to children. The excellent type and make-up of the book do much to compensate for the rather slow-moving text. The book is illustrated with pencil drawings, both full page and small sketches, by Glenna Latimer who has drawn some of the most ingratiating rabbits we have seen outside of the work of Dorothy Lathrop." J. L. Sauer

"Like its predecessor, 'Lappy in the Forest' is more satisfactory as a picture book than as a story. The tale is told with a marked lack of

humor and a tendency toward sentimentality. . . Besides rabbits, the artist has drawn beavers, muskrats, opossums, chipmunks, lizards and other creatures, with accuracy, charm and the humor which is missing in the text. The type is large and clear and the illustrations have a delightful softness that makes us feel we are looking at the original drawings. For children 6 to 9." A. T. Eaton

"Though aimed primarily at the research worker in the library field, this manual should be useful to the practicing library worker who entertains a curiosity about the value of contemporary library literature. Mr. Waples' treatment of research methods will enable such a user to achieve a critical viewpoint. While material for developing such a viewpoint has long been available in many disciplines, few library workers have undertaken to adapt this literature to their own fields. The author has bridged this gap without too strongly interposing his own views. A result of the manual's publication should be a sharpening of critical attention to professional writing. . . "Professor Ward's volume surrenders too much to the demand for the easy introduction. The style is delightfully informal; though the type is needlessly small for comfortable reading. The woman goes to his distant home, in remorse, and he comes back in time to thwart the peasants' efforts to improve their condition, and brings war to the village. "It is a question if a very gifted writer has surmounted the difficulty in which her plot involved her. For my part I do not think she has. That kind of irony which is her *forte* and which she demonstrates so delicately in the first pages of this tragi-comedy, does not consort with the inevitable bitterness aroused by her clear-eyed contemplation of the age-old

plight of the Spanish peasant. . . But writers, being explorers, must make their own bridges to travel by, and this book seems a bridge between the Sylvia Townsend Warner we know and another who is finding a wilder tract for her imagination. Meanwhile, no one who cares for precision and economy of writing, for skill and grace, will miss this not entirely satisfactory extension of the always amusing Don Juan legend." Kate O'Brien

282 Roman Catholic church—Doctrinal and controversial works 39-33140

Primarily the author's theme is that "Catholicism occupies a central position between all extremes and one-sided excesses, reconciling and balancing them by maintaining the positive truth they contain and neglecting their excesses and exclusions. . . But there is a secondary theme . . . [that] the Catholic doctrine, *as it is in itself,* maintains a perfect centrality, marred by no excess, diminished by no defect; but as *as it exists in the mind or conduct of Catholics*—popes, bishops, priests, laity—at any given moment, there may easily be excess or defect." (Publisher's note)

"The author seeks to illustrate the theme that Catholicism is the *via media* which avoids the errors of defect or of excess found in other religions or religious philosophies. In many parts of the book this is well done. But there are too many paralogisms in this book to make it commendable. At times these betray a lack of sureness of professional touch in matters of dogmatic theology." W. J. McGarry

"The evident sincerity of the author, the high quality of his literary talent and the calm logic with which he pursues his theme entitle him to a hearing in this country. Possibly the sole concession he makes to diplomacy is in refraining from suggesting any immediate solution for current British troubles in Mexico. In discussing Mexico's past and present, and in dismissing her future as one vast, disturbing question-mark, he has produced passages which rank as first-rate literature." R. L. Martin

Mr. Waugh's professional intuition, of which gleams appear here and there, is handicapped by the prejudices with which he approached the country. . . Some of the important documents here presented, such as cabinet memoranda of Castlereagh, have already been published, but by far the major part of the papers in this collection have never before been printed. Her diplomatic analyses are perhaps superior to her military, but the latter are sound and interesting. Her narrative is not always easy reading, but that is not to be expected of a serious effort to follow all the cross-currents of the war, and her writing is clear and decisive. She seems to have no special prejudices and the balance is always fairly held in matters of religion."

(Pref) Contents: The denial that Jesus was a teacher; The call to repentance; The kingdom of God; The Gospel and the educational method. Index.

"Dean Weigle's discussion is timely and important in that it states clearly and sharply the issue between modern religious education and the current reaction in theology toward traditional forms of supernaturalism and authority. Around this issue we may expect much more discussion as its implications become increasingly clear. . . One could wish that the author had dealt more directly and explicitly with these current topics in theology which, were they generally to prevail, would render the educational approach impossible 'in the name of God.' "The thesis of this book is that 'the universe is a disjunctive totality of individuals, concrete beings altogether other than the rest,' and its purpose, to interpret all aspects of reality in the light of this thesis. Reality is thus conceived of as thoroughly nominalistic, all 'common universals being abstractable' from individuals, which are 'the obdurate, basic metaphysical facts.' . . . The second section of the book deals with the common metaphysical problems such as plurality, permanence, time and space." (Boston Transcript) Index.

"The author's entire cosmology seems inadequate, and, besides, the great problems of social life, psychological, sociological, or religious are entirely missing. His emphasis on the practical reason is, furthermore, not organically related to the main part of the book, and the six meager pages devoted to ethics at the close are disappointingly devoid of significant content. Under these circumstances, naming the book 'Reality' seems rather pretentious. The author has, however, done well within the sphere of his competence, the analysis of the theory of knowledge; the book is, therefore, best suited for technical scholars in this field." N. J. S. Ferre

"The book is written for philosophers, not for the general public, and its chief interest is for students of logic, to which subject the first half is devoted. . . Its value is not that of a complete and thorough expression of a mature philosophical thinker, but that of a vigorous attack on the old problems by a fresh and keen mind, trained in the use of the modern weapons of logical analysis. The result is stimulating and certainly constitutes an important contribution at many points to the development of a realistic type of metaphysic which will be adequate to an understanding of the nature of personality, and the cosmic significance of its higher values, without resorting to the question-begging term, 'emergence.'" But the book is hard going. Mr. Weiss spins a very fine web of internally adjusted descriptions, and the reader must work very hard if he would be caught in this web—otherwise, he will rip the fabric with inattention and fall through, like a clumsy wasp that blundered into a trap laid for gnats." WELLS, EVELYN. Champagne days of San Francisco [introd. by Lucius Beebe]. 284p il $3 Appleton-Century

917.9461 San Francisco—Social life and customs 39-8740

Stories and anecdotes of San Francisco's gay days, in the nineties and the early 1900s to the time of the Fire. The manners and customs of the day are set forth in a semi-fictionalized account of the wanderings around the city of three "prominent citizens"—a Banker, a Judge, and a Senator.

"The Senator, the Banker and the Judge may be composite characters but their personalities ring true, especially that of the Senator. . . This book is not fiction. Names, places and dates having to do with scandals great and small, with stupendous balls, with city-wide tragedies and comedies, all these are related. . . The book is well illustrated and many of the pictures have not appeared, at least in late years. The volume is a must for all San Franciscans, native or adopted, past or present, for in it is gathered a grand hodge-podge of history that was just as important in making the city what it is as were the more decorous—if more savage—doings of the Senator, the Banker and the Judge when they were at work." S. H. Holbrook

"Despite an impressive texture of factual detail, the effort to blend society reporting with fiction is not entirely satisfactory from a technical standpoint. A more serious weakness is the author's lack of a coherent attitude toward her gorgeous pageant. . . Yet it would be unfair to blame Miss Wells for an attitude that is widely shared by newspaper people; and it should certainly be added, to her credit, that if she shows the journalist's refusal to analyze social phenomena, she has at the same time a journalistic competence in dealing with photographs. The illustrations, dug with great labor out of newspaper files, are documentation of a high order." H. N. Smith

WELLS, GEORGE ROSS. Art of being a person. 300p $2.50 Appleton-Century

137 Psychology, Applied. Personality (W) 39-16203

"Dr. Wells is professor of psychology at Hartford Seminary and writes a popular newspaper column entitled 'Men and Manners.' In this latest volume of his, some of it adapted from the column in 'The Hartford Courant,' he maintains that happiness is not an accident but an achievement, that artistically skillful living is possible for most if not all and that, while we cannot determine the conditions of life, we can understand and deliberately arrange the factors of life in 'a pattern which sets forth their comparative value.'" "In simple, honest, pedestrian fashion Professor Wells surveys the customary problems and situations of human life and brings to these a philosophy based in part upon modern psychology. 'The Art of Being a Person' belongs to that respectable category of self-help volumes which has so long and so repeatedly distinguished the catalogues of American publishers."

Mr Wells reviews the present state of mankind and tries to find some hope of salvation.

His conclusion is: "There is no reason whatever to believe that the order of nature has any greater bias in favor of man than it had in favor of the icthyosaur or the pterodactyl. In spite of all my disposition to a brave looking optimism, I perceive that now the universe is bored with him, [is] turning a hard face to him, and I see him being carried less and less intelligently and more and more rapidly, suffering as every ill-adapted creature must suffer in gross and detail, along the stream of fate to degradation, suffering and death."

Man is a fool, doomed and dammed—unless, before the water rises, he builds a life-raft out of the World Brain. This is all that Mr. Wells has to say to us: the end of his search for knowledge, the result of all his thinking. WELLS, HERBERT GEORGE. The holy terror. 454p $2.75 Simon & Schuster [8s 6d Joseph, M]

The story of the rise and fall of Rud Whitlow, who began life as a particularly nasty little English schoolboy; rose, after the War of Ideologies and the World Revolution, to immense heights as World Dictator; and finally died, a madman, killed by the last man in whom he had any trust.

"This big new novel by H. G. Wells is so lively and penetrating, it drops pat with all its magnificent bounce and optimism at a moment of such tension and dismay that one can scarce forbear to cheer. With as much energy and inventiveness as though he had been born in 1916 instead of in 1866, he tears into a great and eventful tale of the world's future. He does so with the clear determination to say something which he believes is urgently possible and universally desirable and, from the very first sentence, brings to it all his old magic—keen humor, irreverence, appealingly unaffected style, suspense and gusto." The main thesis is that between 1932 and 1939 there has taken place a revolution in military technique. The military power of a country to-day is based on the mobilisation of its entire war potential, which is defined by the author as reserves of man-power, economic resources, and the extent to which both have been militarised. . . WEST, NATHANAEL. The day of the locust. 238p $2 Random house
39-12578

A surrealist novel featuring the little people of Hollywood. "It is, for the most part, the story of a lost bookkeeper from Iowa and his curious misadventures among the ordinary followers of an extraordinary industry: a cocksure dwarf, a purple cowboy, a dying vaudeville comedian, a luscious little extra, Mme. Jenning and her cote of dry-cleaned doves, a Hollywood landlady whose hobby is funerals, a repulsive child actor and his even more monstrous mother—all against a Hogarthian background of food faddists, aged perverts, and religious fanatics." (Sat R of Lit)

"'The Day of the Locust' is superbly written. Less on the surrealist side than Mr. West's earlier 'Miss Lonelyhearts' [Book Review Digest 1933] it is a more disciplined piece of writing; has a flexibility and a finish which the previous novel lacked. But by comparison with the other, 'The Day of the Locust' is emotionally inert. Perhaps because of Mr. West's bitter awareness of the futility of his materials—for certainly the locusts *have* feasted here—he shows none of that intensity of feeling, that idealistic vehemence which marked 'Miss Lonelyhearts,' to my way of thinking, as a great book." F. H. Britten
+ — Books p7 My 21 '39 440w

"There is abundant material here for scathing satire or careful social study, and the principal objection to 'The Day of the Locust' is apt to be that it merely scratches the surface. To make the picture less sketchy, less like the strongly highlighted scenes of a bad dream, it needs more thorough characterization, more documentation . . . to lend perspective. Perhaps this very sketchiness was part of the author's plan, but by presenting only a two-dimensional picture it detracts from the impressiveness of what could well be a very striking arraignment of America's most unbelievable menagerie." But perhaps the best reply is not so much a reasoned defence of Christian history—though that can be given—as the example of Christian lives. Even so, it is doubtful if they would convince Dr. Westermarck. He has raked over history, but he has failed to perceive such outstanding Christian reformers as Wilberforce and Shaftesbury. He notes where the Church has fallen to the level of the world, but does not truly appreciate a Wesley or a Booth who has raised the world a little nearer to the standard of Christ."

WHEELER, WILLIAM MORTON. Essays in philosophical biology. 261p il $3 Harvard univ. press

574.04 Biology—Addresses, essays, lectures 39-4137

"Since Jean Henri Fabre, the French entomologist, no scientist in that field has made so deep an impression upon the minds of his contemporaries as William Morton Wheeler. Dr. Wheeler was a persistent, painstaking student of ants and other forms of insect life, but also a man of broad interests and appealing human qualities. Prof Wheeler's papers contain an assortment of his most interesting investigations. While the papers on such men as Fabre and on instincts and biological theory are perhaps of widest interest, many will find most engaging the chapters on ants." Springf'd Republican

At bottom he recognized that metaphysics, if not wholly sterile, can bear only poisonous fruit; from his position to that of our day is a short step. Like Moses, he was not fated to reach the Canaan of scientific biology; but he and his contemporaries led the way to it. For this, and for the distinctive charm of his personality, this volume well merits to be read." J. M. Reiner

The author presents a concise summary of present knowledge under the headings: population forecasts and estimates, official population statistics, fertility and fecundity, mortality, migration, optimum size of population and optimum composition of the population. The three outstanding problems are stated to be (1) 'the motives leading couples to want a given number of children,' (2) 'the comparison of the present distribution of population within the nation with the optimum distribution,' and (3) 'the changes which are taking place in the hereditary makeup of the population.' . . . WHIPPLE, MRS DOROTHY. The Priory. 528p $2.50 Macmillan [8s 6d Murray, J]

The Priory finally comes into the hands of the wealthy father-in-law of one of the original owner's daughters.

With resort to satire Mrs. Whipple has, by direct and sympathetic but shrewdly discerning portraiture, drawn a picture of vacillation, of ineptitude, of feeble wishfulness and of the sort of snobbery inhering in a disintegrating aristocracy more damning than outright caricature." But the girls marry, and in the picture of their married life the beaten tracks of fiction begin to emerge. One guesses what is going to happen, because one has read it before, and tiresomely it does happen. It quite easily *might* happen, it very likely *would* happen; I do not dispute this, but the freshness is gone. Yet I sincerely

recommend the novel. It is not all that I hoped it was going to be, that the first two hundred pages indeed *are*, but it rises far above the level of ordinary commercial fiction, as far, for instance, as did the romances of Rhoda Broughton in their long-vanished day." Forrest Reid

WHISTLER, LAURENCE. Sir John Vanbrugh, architect and dramatist, 1664-1726. 327p il $5 Macmillan [21s Cobden-Sanderson]

B or 92 Vanbrugh, Sir John. Architecture —England [39-2919]

"The creator of Lord Foppington and Sir John Brute in comedy, and of Castle Howard and Blenheim Palace in stone, has waited two hundred years for this, his first biography. The book is neither a volume of annotated research nor of psychological speculation. The author sticks pretty close to recorded facts about Vanbrugh. Here is a running account of the staging of his plays, a chapter on the Kit Cat Club, mention of Vanbrugh's career as soldier and as Herald. Inevitably, the story of Vanbrugh's life becomes overweighted with the record of his architectural ventures. The biography approaches drama in the retailing of the long feud between Vanbrugh and Sarah, Duchess of Marlborough." (Sat R of Lit) Bibliography.

"It is curious that there has hitherto been no full-length biography of this attractive and charming genius. . . It has been left to Mr. Whistler to fill completely the gap upon our shelves, and this he has done very satisfactorily, bringing to his task insight, taste, enthusiasm, wit, and the imagination of a poet. He has chosen a fine subject for the exercise of his talent." S. C. Chew

"In 'Sir John Vanbrugh,' Laurence Whistler has done a much-needed piece of biography. Before Vanbrugh died the romantic movement, which in architecture had a hideous outbreak in Walpole's 'Strawberry Hill,' was under way. The formalism of Wren and Vanbrugh was giving place to lines less severe. But the work and the lives of these two men, touching at innumerable points, were enduring forces in the making of modern England." Percy Hutchison

"Mr. Laurence Whistler has written a very charming book, but it is difficult for one who knows the sources and the material to assess its value; so much of it seems familiar, so little new. Nor is Mr. Whistler, one would say, of a sufficiently different generation from recent writers on Vanbrugh to see him from a new vantage ground. Yet though it is not quite true to say with the publishers that this is the first study apart from editorial comment to be written on Vanbrugh, it is the first book to be completely devoted to him. Moreover Mr. Whistler is the first to attempt a popular justification of Vanbrugh as an architect, and he has done it extremely well, gathering together the recent findings of experts, and writing at his best and most vivid when describing Vanbrugh's work." Mr. Whistler adds to the main story some new points about the influence of Vanbrugh appearing not in any so-called 'heavy loads,' but in small houses; and one of his most charming and original chapters shows Vanbrugh as a designer of 'the great garden' at a point of perfection between the formal and the landscape. It only remains to add that this biography of Vanbrugh tells with due movement and colour the ups and downs of his eventful life, and that the 'sweet-natured gentleman,' with all his earnestness and all his fun, lives in these entertaining and instructive pages."

He insists that variety is Nature's great antidote and that, where life does not provide it, the individual must seek it consciously in society, sport, art, music, reading, radio and travel. The book is divided into three sections dealing with people in life situations in general, presenting unwholesome behavior due to tedium, furthering mental health." Survey

"This is a popular book. As a representative of its class, it clearly indicates some of the reasons for the layman's distrust of psychology. For one thing, the title is so much bait. It implies that the author is approaching his problem armed with facts and theories which arise from and are peculiar to the science of psychology. This is not true. Five of the chapters might well have been written by a teacher of composition and rhetoric. The remainder is less a scientific discourse than an essay on some commonly accepted notions concerning social relations. The title also indicates that the reader will be given specific and practical plans for the construction of an interesting existence. If such plans are given, I could not find them." S. R. Wallace

love of the theater, and the French stage. This taste was made manifest in the consequent revival of English comedy which took place during his reign. The present study attempts to decide the extent of the influence of Molière's plays on the revival. The author concludes that while English dramatists borrowed copiously Molière "made no significant contribution to the type of comedy we associate with the Restoration." "Miss Wilder has something to say. She is aware of the most subtle shades of personal awareness in a terrifying world. She is by no means a dull and conventional poet. Nevertheless, she has not yet learned from Emily Dickinson the two essentials of great poetry. . . With a spirit as much in rebellion against her times as was Miss Dickinson's against hers—and as well disciplined, Miss Wilder does not seem to realize that to become art the outer world must be represented always as experienced inwardly—the inner world, in reverse, as objectified. And for this poetic language must be very precise." E. L. Walton

WILLIAMS, CHARLES HAROLD. The modern historian. 309p $3 (7s 6d) Nelson
907 History—Methodology. History—Historiography 39-11778

"This volume consists of a series of extracts, over sixty in all, from English historians of the present century, preceded by a brief introduction. This explains how historians at the opening of the twentieth century were faced by new problems resulting from the influence of science, and changes in the political, economic, and cultural environment. Science encouraged exactitude and impartiality, but in essaying to be scientific the historian ceased to be interesting, and hence Mr. H. G. Wells and other non-historians sought to supply the demand for an historical explanation of the confusion in the world about us. The historian of today, therefore, while concerned with the problem of specialization and the continued influence of science, as also with the growing expansion of his subject, is also concerned with the task of meeting the popular demand for readable history. . . The volume does not go outside England for its examples, despite the inclusion of a passage from Toynbee as to what constitutes 'an intelligible field of study' for the historian." Canadian Hist R

"Within [its] limits the extracts are in the main well chosen. No two persons would agree as to the exact choice of authors. To the reviewer the exclusion of writers such as Marvin and Laski, the Hammonds and the Webbs, Christopher Dawson, Lowes Dickinson, and others, seems surprising. And it might have been worth while to quote what a biologist, a psychologist, an anthropologist, a sociologist, and a geographer had to say about history. Admittedly, however, the main problem is one of space. There are not many volumes of this kind, and from it the student of history can fairly learn what the leading English historians of today think of their subject." R. Flenley

Considering that history is done on the large scale, that the historian—unlike the poet—reckons his work in volumes rather than lines, it is a great achievement to have made such an anthology at all; there are one or two surprising omissions, and at least one passage seems to have been included more as a warning than as an example. But on the whole the book attains it purpose; its roll of great names is in itself a crushing answer to uninformed criticism; the reader is given a new awareness of the activities of historians, and will pass on from these selections to the originals." 351.80973 U.S. Federal emergency administration of public works. State finance—Federal aid 39-32259

"A startling variety of new administrative techniques has been developed since March 4, 1933. . . Transformation of the relationships among federal, state, and local governments has been one of the most significant of these changes. Especially noteworthy has been the establishment of direct contact between the federal government and local governments—the state governments being thereby 'short-circuited.' Dr. Williams' . . . volume is essentially a study of the Public Works Administration's contribution to this new relationship—grants-in-aid made directly to local governments. She discusses . . . the reasons for by-passing the state governments in the grant and loan program; the criteria for approval of projects and distribution of grants and loans; the early centralization and more recent regional decentralization of the organization; reasons for the aggravating delay in getting projects approved and in operation; the techniques used by the P.W.A. to enforce compliance with federal regulations after a project has already been approved and initiated; the increased use of revenue bonds and the creation of special 'authorities' to evade debt limitation statutes; the rôle of the P.W.A. in advising on or lobbying for adequate state enabling legislation; and the desirability of a permanent public works agency." (Am Pol Sci R) Index.

"Dr. Williams has performed a scholarly and realistic piece of research, which she presents in an interesting fashion. She shrewdly distinguishes between what the procedures were on paper and what actually happened. At the same time, her soundness of judgment is evidenced by her relegation of several newspaper *causes célèbres* to the footnotes with a suggestion that they were atypical. The few adverse criticisms that are warranted do not substantially detract from the volume's great value. At times, the text bogs down in detail; sometimes, too, the reader loses track of the several chronological phases of the P.W.A." J. W. Fesler

WILLIAMS, ROGER JOHN. Textbook of biochemistry. 525p il $4 Van Nostrand [21s Chapman]

612.015 Biological chemistry 38-23965

"Dr. Williams has written a short textbook of biochemistry, which presents the material in a manner somewhat different from most texts which have appeared recently. The order of presentation of the subject is obviously responsible for the novel features. The book is divided into five parts. The first three sections concern respectively Biochemical Materials (largely colloid and organic chemistry, presented briefly), Tissue Composition and Food Composition. The last two which may be considered as the physiological applications, are respectively Bodily Mechanisms for Regulating Chemical Change, and Metabolism." (Am J Pub Health) Glossary. Index.

"The conventional description of fats, proteins, and carbohydrates is well balanced with proper attention to chemical properties on the one hand and biochemical significance on the other. Other materials of biochemistry usually are considered in relation to function rather than structure to the bewilderment of the student accustomed to the orderly system of organic chemistry. . . There are remarkably few errors. . . The author is tolerant in his discussion of new theories and shows good judgment in evaluating current trends in biochemistry." D. B. Dill

WILLIAMS, WILLIAM CARLOS. Complete collected poems, 1906-1938. 317p definitive ed $3 New directions

811 39-502

For descriptive note see Annual for 1938.

"I believe that it would be a mistake to regard 'The Complete Collected Poems' as anything other than a midway signpost in Dr. Williams's literary career. Even the earliest poems in the book are still alive and growing, and unlike most of the work of his contemporaries (Dr. Williams is over fifty) the present volume of poems gives promise of a vitality to be extended into the future." Horace Gregory

"This book cannot be ignored by any one concerned with modern American poetry. It should assure William Carlos Williams of the place, just below the first, that is rightly his among the poets of his time. The book is beautifully made, and lacks only an index of first lines to make it a model that might well be aped by the commercial publishers of collected poems." Mason Wade

"A cover-to-cover reading of this definitive edition of Williams' collected poems shows how close and consistent this poet's contact with the natural, the human, the heterogeneous but strongly individual facets of American life has been. And, what is even more important, the chronological groupings of the poems demonstrate the incisive development not only of Williams' technique, but his growth, through choice of subject, as a poet whose deepening social perceptions have kept his poems alive.

"Perhaps not all this poetry is wholly satisfactory. Williams is not always touched in the depths and suffused with the feeling which gives scope and density to form. But the volume contains a number of lyrics . . . which rank with the poetry of our time highest in quality. The whole of the poetry has worth. All has texture, truthfulness, subtle consciousness of life. Mr. Williams has a sovereign gift for animating his emotions." Paul Rosenfeld

It was not her fault that she was suddenly removed from the world of affluent mediocrity in which she had lived with inconspicuous success, and forced to play a part for which she had neither the character nor the training."

The introduction is oversentimental, and the whole portrait in the romantic manner, but that is perhaps inevitable. . . The account of the League campaign is spirited and moving and if Mrs. Wilson overestimates enthusiasm for the League and fails to mention the counter-campaign of Borah and Johnson and the irreconcilables, that is pardonable. . . Mystery story for girls. The time is the early nineteenth century.

"It opens in 1815 and Lafayette makes more than one appearance, but little in speech or surroundings makes it seem different from today, and children just emerging from fairy-tales will consider a child mysteriously left on a doorstep and growing up in pantalettes, as a pleasant next step in fiction. Costume has much to do with making these pictures so pretty; that and Miss Wilson's liking for gayety and knack of drawing pretty faces." M. L. Becker

There is real charm, however, in much of the writing, in the evocation of inn life, in the descriptions of children capering in the brilliant afternoons of a New England Autumn, and the eerie magic of Hallowe'en lights. The sprightliness of the style is reflected in the author's illustrations." E. L. Buell

B or 92 Elizabeth, queen of England.
English poetry (early modern to 1700)
39-3678

"This is a comprehensive and systematic study of the public character of Queen Elizabeth, of the picture of the queen as it was offered to her subjects in the printed literature of her reign, from the humble broadside ballads to the stately eulogies of Spenser and his imitators. Each aspect of the virgin Queen is treated in a separate chapter amply documented from the kind of writing in which it is most apparent, and the whole is bound together by judicial summaries. Many of the sources quoted at length will be unfamiliar even to specialists in Elizabethan literature. Fifteen unusual illustrations suggest the visual image of the queen with which her subjects supplemented that which they drew from print. There is a useful index and a scholarly short title list of some two hundred and fifty books and manuscripts dedicated, inscribed, or presented to Queen Elizabeth." Sat R of Lit

"Mr. Wilson's book is not only a history but an anthology, for he quotes liberally from the poetry of the reign, the lowly ballads and the formal panegyrics, sonnets, devices, pageant-verses, prayers and speeches in the dramas, allegories and elegies. The illustrations add greatly to the value of the book. Especially to be commended is the frontispiece, a portrait of Elizabeth reproduced from a French manuscript in full and most exquisite color." "Mr. Wilson is able to use the ideal vision of the queen, as it molded the minds of her people and was in turn molded by them, as a clue leading straight to the heart of the Elizabethan character, of the national temperament which produced the greatest English poetry. 230.3 Protestant Episcopal church in the U.S.A.—Doctrinal and controversial works
39-6947

The Episcopal Bishop of Eau Claire "writes primarily for the lay people of his own communion, 'to uncover some of the whys and wherefores of Christian conviction,' in the form of very simple statements of the church's doctrines of God, Christ, the Bible and revelation, the church, ministry and sacraments, the 'last things,' obligations of membership, and so forth. And since he realizes that even with the will to believe people do have difficulty in believing, he undertakes to make belief easier by using time-honored arguments from probability or helpful analogies from the realm of everyday experience. He teaches and persuades to things which, by and large, many of us would have our people know and accept, partly as evangelical Christians, partly as Episcopalians." (Christian Century) Index.

"To the constituency of The Christian Century, Faith and Practice would be of interest mainly as illustrating the sort of instruction that moderate Episcopalian clergy are accustomed to give their people, although few of them do it with the bishop's clarity and persuasiveness." P. V. Norwood

Christian Century 56:742 Je 7 '39 450w

"Very often our clergy are asked: 'For what does the Episcopal Church stand?' The very best answer to that question is given in this book. 511.07 Arithmetic—Study and teaching
39-11017

"Telling what to teach and how to teach it, this book seeks to develop a more rational view of arithmetic as a functional service tool in the lives of children and adults, through emphasis upon the purposes of arithmetic and the limitations that need to be observed in order not to defeat these purposes. The authors maintain the thesis that common adult usage should be the limit of any arithmetic undertaken for drill mastery in the grades and general high school. Arithmetic as a subject for life use—for effective community service—rather than arithmetic for mental discipline, is stressed throughout the book. Thus the presentation and treatment of materials departs from the traditional in that there is a definite drive for accomplishing purposes." (Publisher's note) The senior author is professor of education, Boston University. Index.

365 Crime and criminals. Psychology, Pathological. Prisons 39-15185

" 'Careful study of over five thousand case histories convinces us that practically all the difficult problems we have to face in prison administration are in the last analysis resolvable into their psychological factors.' With this preliminary statement the authors proceed in six chapters to define and discuss the types of prisoners which can be divided into definite groups—the normal, the feeble-minded, the psychoneurotic, psychopathic, the psychotic or insane, the neuropathic, homosexual, and recidivist. They make special reference to the treatment prisoners in the various groups should receive and the administrative difficulties which each one of them presents. They give their views on the subject of discipline, on the type of man the prison psychiatrist should be, and conclude their book with an inquiry into the value of imprisonment." Scientific Bk Club R

"Conservative and cautious, this is at the same time an essentially modern and forward-looking book. Often a psychiatric service in a prison has been somewhat exotic and quite removed from the routine of the institution. Not so with Doctor Wilson; he has entered upon the responsibilities in a broad way, cooperating with those in authority, and so has made real progress." A. W. Stearns
+ Ann Am Acad 206:219 N '39 350w

"While the book is undoubtedly of value and importance because of the material and the approach, there are certain weaknesses which should be mentioned. The psychiatric classification seems adequate enough, but like all psychiatric labelling devices, creaks a little at the joints and cannot be regarded as the last word by any means. There is a noticeable tendency on the part of the authors to adopt a somewhat narrow, antiquated and inadequate psychological approach, in which instincts, faculties of the 'mind,' and the acceptance of an organic basis for mental ills plays a large part. There is also a deplorable display of fuzzy moralizing which is distinctly out of place. . . The style and form are just a little below the standard which one has come to expect in specialized works by authors who are not primarily literary men. For those who are interested in problems of crime, criminals and prison administration the defects mentioned will not prevent this work from serving as a stimulating study and a valuable source of information." Full of drastic warnings against bureaucracy and of equally drastic criticisms of our political system, it could not possibly have been published under any totalitarian regime or have received governmental sanction even in France or Great Britain. . . There is one significant and deadly omission in the book. In the discussion of farm policy no specific consideration is given to the crucial problem of the sharecropper and tenant-farmer so notoriously neglected by the Roosevelt administration. In the face of that damning omission, while one rejoices in the department's awareness of the roots of democracy, one must still lament that its own democratic roots are not deeper." E. S. Bates

183.2 Socrates 39-14088

"This interesting example of historical materialism explains who Socrates was by tracing the genesis of his philosophic thought in function of his economic, political, and social circumstances. The early Socrates, a free artisan or perhaps even a slave, was democratic, radical, skeptical, one of the Anaxagorean scientific materialists and akin to the sophists. But his increasing material prosperity gradually turned him toward the oligarchic conservatives, and then he taught an idealist philosophy negating the earthiness of the democrats' aims and interests." (Ethics) Bibliography.

" 'Debunking' is sometimes just as objectionable as is undue glorification. It is one thing to point out the concrete social commitments that keep us from regarding Socrates as a figure of exalted, quasi-divine detachment; it is another to leave the poor old gentleman without one redeeming feature. The authors' Leftist inclinations have caused them to inject so large a measure of value-judgment into their analysis that Socrates becomes merely a 'stooge' for the scheming oligarchs. . . Yet in spite of misgivings, it can be said that anyone interested in the sociology of knowledge, in Greek social history, or in the history of social and political thought should read this little book. Less than a hundred pages in length, it contains more seminal ideas than many bulky treatises." Howard Becker

Soon he became a noted preacher, but, discontented with conditions in the cloister, he finally ran away, probably in May, 1522. He wandered through Switzerland and Germany, meeting Zwingli at Zürich, Luther at Wittenberg, and Bucer at Strasbourg. Finally in 1526 he was invited by Landgrave Philip to come to Hesse. There his first task was to take the lead in the Homberg Synod of 1526, at which the Catholics were declared defeated. He composed a plan of organization for the Hessian church that was never adopted because of Luther's influence. WISE, MRS EVELYN (VOSS). As the pines grow. 256p $2 Appleton-Century

(W) 39-9395

This new novel by the author of The Long Tomorrow (Book Review Digest, 1938) tells the story of a Minnesota farming community from about 1910 to the post-War era. The story concerns chiefly young Peter Beresford and the conflict of temperaments and desires between him and his father.

"The first part of the novel particularly is distinguished by the simplicity and the richness of regional background which marked the author's previous novel, 'The Long Tomorrow.' Later in the novel, when Peter is away from the farm, when the war drama in Bentley is subordinated to his slighter personal experience, the story loses power. The events following his return to the farm are weakened by the break in continuity. But Mrs. Wise's writing has realism and charm when she is integrating individual problems and group activity in a setting which is part of her own experience." G. B. Birk

"The material is much better than the book itself. One accepts without understanding Peter's adoration of his proud, mysterious father. The girls are stock figures and the tenant farmers and their wives and families are only slightly more real. Mrs Wise tells us of the stress and emotion of Peter's life, but it is a pity she does not convey the feeling."

The oldest of the five "sons" of M. Witmark and sons, music publishers, tells the story of fifty years of the firm's existence. The business had its inception when an eleven-year-old boy was given a toy-printing press instead of a medal for proficiency in arithmetic, an older boy lost his job, and the printing press was put to practical purposes. In the course of the story are many anecdotes of famous song writers and singers of bygone days.

"Since it ought to be quite impossible to write an unreadable book about that very colorful figure, Diego Rivera, it is not surprising that Bertram Wolfe has produced one which is entertaining as well as weighty. Amply and well illustrated, it develops in considerable detail the successive phases of the painter's career. . . . Though Mr. Wolfe's account of the artist's life and work is enthusiastic and hardly at all critical, he does succeed in setting his subject plainly before us in all his complexity. Beyond all more personal matters, the most abiding impression which the biography leaves is of volcanic energy and missionary fire, of the long hours of grueling toil spent by the artist on the scaffolding before his immense pictures." Nevertheless, the book is highly recommended. The reader who seeks casual entertainment will find it, and the real admirer of Diego Rivera, by a further recognition of the problems he is having to face may gain a more sympathetic insight into the character of the man himself." WOLFE, THOMAS. The web and the rock. 695p $3 Harper

(W) 39-27574

In a foreword the author, who died last year, explained his work as it seemed to him: "This novel marks not only a turning away from the books I have written in the past, but a genuine spiritual and artistic change. It is the most objective novel that I have written. I have invented characters who are compacted from the whole amalgam and consonance of seeing, feeling, thinking, living, and knowing many people. I have sought, through free creation, a release of my inventive power." In fictional form, but probably based on Wolfe's own life, it is the story of one George Webber—his youth in a Southern town, his college days, his teaching, trip abroad, and his unhappy love affair. Thru the whole book runs the account of George's unsuccessful quest for an understanding of the meaning of life.

From this current novel and its predecessor, which was slightly better, one can only get the impression of a great oaf stumbling around the earth, trying to kid, first himself, then the public that he was on a constant journey of miraculous discovery. . . Like the curate's egg, however, parts of the book are excellent. A good part of the first 300 pages are worth reading, particularly the story of the negro gone berserk in the southern mountain town on a winter night. Curiously, the best parts of the book have to do with George Webber only as spectator. . . 'The Web and the Rock' as a whole isn't worth reading." Harry Sylvester

WOLFE, THOMAS—*Continued*

"Judged as a piece of editing [this novel] is able and conscientious. Judged as a new book by Thomas Wolfe, it is decidedly less successful. That is a fact one would hardly suspect from reading most of the reviews it has so far received. The critics have apparently been swayed by their warm personal regard for the author, which everybody shared, and by their hope that his astounding promise would somehow be fulfilled in spite of death. But the truth ought to be told, even in a review that reads like a letter of condolence. And the truth is that 'The Web and the Rock' is by far the weakest of Wolfe's novels —is indeed so weak that there is a justified question whether most of it should have been published at all." Malcolm Cowley

" 'The Web and the Rock' must definitely be a disappointment to those who were confident of Thomas Wolfe's continuous development. It leaves him still caught in the furious whirl of his immediate reactions and emotions. . . It shows him as distant as ever from that selectivity which a mature art must practice. But it is vital as everything which he wrote was vital, and it is worth reading, not for its theme, in which there is nothing essential which was not already contained in his earlier work, but for its details and its commentary. Wolfe brought to the American fiction of his time qualities which were unmistakably his own, and they are displayed here again in generous quantity." J. D. Adams

"The most boring pages in Wolfe are the most personal ones; the most fascinating are devoted to people and scenes he remembers vividly, but which he does not incorporate within his gigantic sense of self. Not that the succeeding 525 pages are without interest, but one must pick and choose among them, wade through overwritten passages, repetitions, and almost incredible naïvetés of thought and feeling." "If 'The Web and the Rock' had been published as two novels, it would be possible to say that the first half was Wolfe's best novel, the second half his most disappointing. This is surprising, because in general the first half is repetition of what he had done before, and the second is an excursion into a new field. . . It is the first half, also, in which Wolfe more nearly succeeded in his attempt to gain objectivity, because it is here that the character and growth of George Webber is most in the background; many of the scenes do not involve him as a direct participant. But that is all that can be said for the objectivity of 'The Web and the Rock.' . . But ultimately it makes no difference. In spite of everything, Wolfe was a genius." George Stevens

On the other hand, despite the author's enormous vocabulary of disgust and ecstasy, there are many pages which are dull, trivial and repetitious. As in the moving pictures, a scene which might be striking if treated swiftly and briefly is spoiled by being dragged out to an intolerable length. "Sister Madeleva, although she makes no innovations, is familiar with the tradition of English religious verse, and she profits legitimately from what she has learnt. 'Dream-and-travel-dazed Odysseus' indicates a fresh, informed attack, a sensitive perception. In her most successful pieces the cadences are sharp and contribute to the emotion; the energy constructed is not great but it is genuine. What she really lacks is drive, original speed." John Craft

"Sister Madeleva's poems have warmth, the sort of warmth, indeed, that makes certain woman poets very popular. But her warmth is contained and does not overflow into fervencies. The warmth is there and it gives a sense of actual contact with the poet. And Sister Madeleva has another mood. She has the discipline of solitariness, and out of this come poems that I, for one reader prize more than the ones that have a sense of another's presence." Padriac Colum

WOMEN and the way; Christ and the world's womanhood; a symposium by Madame Chiang Kai-shek [and others]. 198p il $1; pa 50c Missionary educ. movement

396 Women in Christianity. Christianity 39-2294

"The chapters of this book have been written by a number of Christian women—twelve of them—living in various parts of the world, who believe that they have found in Christianity a 'way' to build a world of happiness, peace, and mutual understanding. Each one is loyal to her own country and to her own national ideals, but each sees in Christ the one who will fulfil the loftiest aspirations of the human heart and bring all the nations together in a world-fellowship." "Twelve able and eminent Christian women, of various countries, give their estimates of what Christ has meant for women in their own lands—and these lands pretty well cover the world. It is hard to imagine how this could be better done than it is done in this admirable symposium."

WORDSWORTH, WILLIAM, and WORDSWORTH, DOROTHY. Letters, the later years, 1821-1850; arr. and ed. by Ernest de Selincourt. 3v $21 (63s) Oxford

B or 92 [39-12847]

"These volumes complete the series in which Mr. de Selincourt has assembled most of the vast extant correspondence of Wordsworth and his sister. They cover the last thirty years of his life, whereas Dorothy's letters, which surpass his in geniality and naturalness, come to an earlier end, owing to the failure of her health. There are also a handful of letters by Mrs. Wordsworth, and since she was often William's amanuensis, many little paragraphs and postscripts are not merely the product of her pen but of her happy heart. About half the letters, i.e., 571, in these three volumes are here printed for the first time, and many others from which only extracts were printed by former editors are now given in full. Twenty-six which were discovered too late for inclusion in their proper places as of the years 1794-1820 and which are, because of their earlier dates, of greater interest than most of the later correspondence, are given in an appendix. In these three volumes, containing 1,400 pages, there are 1,044 letters, of which Dorothy wrote 112." (Sat R of Lit) For earlier volumes in the series see Book Review Digest, 1935, 1937.

"There are naturally fewer letters from Dorothy's pen, and those, though full of small gossip, not much livelier than her brother's. The three stout volumes, including more than a thousand letters, of which the greater number are here published for the first time, are a monument to the editor's scholarship and to the patience of whosoever plods through them. They should of course prove useful to any future biographer of Wordsworth." Babette Deutsch
+ Books p12 Ap 9 '39 700w

"Wordsworth, as he appears in these volumes, is seldom companionable and often not even attractive, but he was admirably courageous. The frequent references to his eyes show that he suffered an almost continuous physical handicap. But this will not fully explain the change that came over him. In the early days life had given joy, and now joy had departed and endurance remained. Professor de Selincourt has presented the evidence for these later years in a manner which is beyond praise. He is the most self-effacing of editors, but he is always at hand when wanted. With these volumes he completes one of the great tasks of literary scholarship in our time." B. I. Evans

"These final volumes of the Wordsworth correspondence—fascinating as a human document, for they tell *everything*—exhibit, as no novel has done, the gradual contraction of the souls of people growing old together. And it is a saddening picture, for now that all the cards are at last on the table it seems impossible, *pace* the gallant Miss Batho, not to concede to the critics of Wordsworth that after middle life his sympathy and understanding ceased to be exercised in the cause of what is roughly known as Progress. . . These volumes, like the others, are a model of editing, though the non-specialist could perhaps have done with a little more information, in the form of foot-notes, on the obscure points raised in many of the letters." First of a proposed series of annuals, edited by the editor of Living Age and a contributing editor of the North American Review. This volume gives a detailed survey of world events during 1938. 354.42 Prerogative, Royal. Great Britain—Politics and government 39-5601

"A study of the royal prerogative in the reigns of the first two Stuarts. . . It consists [of an] analysis, difficult to make because of the rapid political changes, of the conflicting views then held as to the nature and extent of the legitimate authority of the king and of his relation to the houses of Parliament. Hobbes was right when he saw in this great struggle nothing less than a contest for actual supremacy; but no account of it could or should satisfy us which did not take full account, as this study does, of the arguments from law and precedent used on either side. These are set forth here with clarity and comprehensiveness, and everywhere illustrated by a most judicious selection of pointed extracts constituting one of the greatest charms of the book." Am Pol Sci R

"One might wish that the author had stopped short before writing his two concluding paragraphs in which he seems to identify the rule of law with mixed monarchy and condemns the former as 'a static social system.' The 'monistic state' is not necessarily the state of Hobbes or Filmer or Hitler, nor is the rule of law the negation either of sovereignty or of progress. This, however, has nothing to do with the author's main discussion; by that the book should be judged, and so judged it is

"The contract clause of the Constitution has been more productive of litigation than any other positive limitation upon the powers of the states. During the last half-century, its importance has declined on account of the development of the due process clause. The principles established during the period in which the contract clause predominated were and are of significance, and an understanding of their historical development is essential. Professor Wright's book provides an excellent medium for securing this knowledge and represents the results of careful study of the cases and the circumstances under which they arose, as well as of the influences that affected the decisions. More than that, it is an exposition of the judicial process that will be of value in considering the development of other provisions of the Constitution." Am Pol Sci R

"The design of this bibliography is to list the American editions of novels, novelettes, tales, romances, short stories, and allegories, in prose, written by Americans. The few foreign-born authors who are included claimed the United States as their home. . . The bibliography was compiled to serve as a guide to the books of American fiction rather than as a complete bibliographical description of them. The compiler has seen the majority of the titles, but rarely has he examined more than one copy of a title. Consequently, any variations between copies are not noted, and in only a few cases are distinguishing points of issues brought out." (Introd) Index.

"This is neither a collectors' bibliography, with discussion of varying editions, nor a complete check list, for it does not draw upon the resources of all libraries, nor does it include usually an examination of more than one copy of a title. The tackle need not cost over fifteen cents, so that almost any boy can fix his own equipment, if he wants to. There is a plea for sportsmanship—for consideration of other fishermen, and of the laws, and for keeping no more fish than one needs." Library J

Noel Wynyard does not minimize the drawbacks of tropical life, but she overcame them; they took some overcoming at times. She went to Siam as a bride. Her husband was forest manager to a timber firm, and she shared his rough life to the full. . . Life in camp was hard going, and dangerous, too, at times, as anyone who has negotiated a tropical stream in spate knows. We are shown glimpses of civilized life, usually in convalescence from malaria and dysentery, in the Dutch East Indies and the Straits Settlements or Burma, but the best parts of the book are the descriptions of timber logging, elephant management and camp life amid the friendly tribes in remote parts of Siam." WYSOR, WILLIAM WIRT. Old sherry; portrait of a Virginia family [letters ed] by Frank J. Klingberg. 218p il $3 Garrett

920 Weiser family (John Conrad Weiser, 1660-1746) 38-30406

This "portrait of a Virginia family" is based upon old letters and other family papers belonging to the Wysor family. In an introductory chapter the editor tells the story of the origin of the family, their settlement in Virginia, their fortunes during the Civil war, etc. The main body of the book is composed of letters from William Wirt Wysor to his family, written during his consulship in Spain from 1893 to 1897.

"The chief value of the letters lies in their revelation of the psychology not only of the writer but of his forefathers and kinsfolk. Dr. Klingberg's book is a scholarly and engaging story of the family's history in terms of the national stocks comprising it and of the impact of southwestern Virginia's environment on it." " 'The City of Gold' is a forthright, temperate novel which one will be glad to have read, but which offers no great excitement in the reading. For Francis Brett Young resolutely withholds all cinematic bribes to gain one's interest, and although the novel is crammed with potential melodrama, romance, and high tragedy, there is little sound and fury. A little heightening here, a little more emphasis there, and the novel would, superficially at least, have more vitality and a swifter pace. . . Those who are interested in the fascinating sub-continent (including certainly all readers of 'They Seek a Country') will find 'The City of Gold' a delight and a mine of information." R. A. Cordell

"As a source of information the book interested me, as a novel, concerned with the Grafton family, I must confess that I found it scrappy. This is mainly due to its construction. No sooner is one's interest aroused (in Janse's search for gold, for instance) than the curtain is dropped and the story given a fresh turn, introducing another set of characters. It may be, considering the breadth of the ground Mr. Brett Young has undertaken to cover, that this was inevitable, but it means that the book fails to establish, or at any rate to maintain, any real grip on the imagination. There is no central figure through whose mind the events are seen. The characters are adequately drawn, yet one gets the impression that the author is less interested in them than in the crises through which the country is passing." Forrest Reid

"The one aspect of the lifework of Thomas Carlyle which he considered most important—his attitude toward the writing of history and his practice of the craft—has been, if not generally ignored, at least insufficiently pondered. I have undertaken to consider Carlyle's philosophic approach to the materials of history and his theory and practice of what he himself designated as the 'art of history' with a view to appraising his claim to a place in the select company of those who have left us an enduring record of the past. I have approached the problem by taking the broad and traditional view of history as the handmaiden of the arts, conspiring against time to rescue the past from oblivion. This study is the outcome of a belief that the moment is ripe for a fresh consideration of the controversy between Dryasdust and the literary historian." (Pref) Bibliography. Index.

"The arrangement is logical and the treatment of each subject incisive. The exposition is understandable to a beginner and yet is so thorough and well integrated as to be suggestive even to the advanced student. The excellence of Dr. Young's chapters on interviewing, the historical method, and the case-study method (to take only three) is matched by that of Professor Schmid's chapters on statistical concepts and techniques, graphic presentation, and the ecological method. All fit well into the scheme of the whole and the quality of the work is uniformly scholarly. Not only are methods and techniques made vivid by constant illustration from surveys and research projects, but subsequent chapters are devoted to the studying of culture groups, institutions, and urban natural areas in order to show just how various approaches can be integrated in actual research. Auxiliary aids to clarity, such as tables and figures, are generously employed, and the value of photography as an observational technique is illustrated. The questions and suggestions for further study at the end of each chapter should prove pedagogically valuable. . . The only omission that struck the reviewer—and this is perhaps not serious in an introductory book—is that of any discussion of the logic of science." R. C. Angell

Despite a provocative subject and conscientious handling, the book is not wholly successful either as a political biography or a case study in paranoia. On the score of scholarship alone it richly deserves the term. One thing at least is certain—no one hereafter can write of Sutter without putting himself in Mr. Zollinger's debt. If the character of the great Californian is not entirely unriddled, I do not know that the author can be blamed. The man was compounded of paradox. One's chief complaint is perhaps an ungracious one. Mr. Zollinger, who is Swiss by birth, has more than a little trouble with his informal English diction. He mangles his metaphors recklessly and has a way of choosing words which sound rather like the one he is looking for." Margaret Wallace

ZUNSER, MIRIAM SHOMER (SHAIKEWITCH) (MRS CHARLES ZUNSER). Yesterday. 271p $2.50 Stackpole sons

296 Jews—Social life and customs. Bercinsky family 39-12571

Chronicle of the author's family thru three generations, beginning in the Polish ghetto during the reign of Czar Nicholas I, and ending in New York in recent years. It is made up of anecdotes and reminiscences of various members of the family, including her mother, father, grandfather and uncle.

"One reads Mrs. Zunser's book with mingled satisfaction and disappointment. Any chronicle of three generations of one's own family, especially when that family is Jewish, has obvious pitfalls—sentimentality, the false glamour of things remembered, the bitterness of a persecuted minority. These faults 'Yesterday' largely avoids." T. L. Mikules

Much of it, apparently, she has gotten by oral tradition, customary in Orthodox Jewish families before 'enlightenment,' knowledge of Gentile culture and ways set in; so, in a measure, the chronicle has the charm of folk mood and legend." ZWEIG, STEFAN. Beware of pity; tr. from the German by Phyllis and Trevor Blewitt. 498p $2.50 Viking

(W) 39-27216

The action of this first full-length novel of Herr Zweig's is laid in Austria just before Sarajevo. It is the story of a young army officer, who, moved to pity by the plight of a lovely young cripple, becomes engaged to her. When it is apparent that the girl can never recover completely, he runs away in panic. The end is tragedy.

"It is a rich novel, and often an unusually beautiful one. What is good in it is a really superb clarity and definiteness; some of its characters walk with a full-bodied tread, and the whole is pervaded by intensity that holds the book together. . . Yet wonderfully written as it is throughout, it is almost too consciously written. One knows a little too well what he has tried to say; the story becomes secondary to its moral." Alfred Kazin

"The formula is that of the Victorian novel or the woman's magazine, and only Herr Zweig's admirable style and polished philosophisings lay claim to anything better. It is the philosophy indeed that has called forth most of the praise that Beware of Pity has won in so many quarters. . . If Herr Zweig was a chronicler one would praise his skill in making the unlikely credible; as he sets out to be a creator one must rather deplore his lack of imagination. Perhaps his historical studies are the real cause of the trouble; the biographer is so dependent on events that he tends to see his characters only in their picturesque superficials." John Mair

" 'Beware of Pity' reaffirms Zweig's great ability for story telling. Indeed, it is almost too cleverly and excitingly told; one feels that with a little more care for essentials, a little more striving after depth, it might have become a truly remarkable novel. As it is, [it] is an original and often brilliant one. . . If [the book] has an important weakness, it is that Zweig has seldom resisted the temptation to be melodramatic, to overplay the real drama of his story by means of climaxes and coincidences that seem too fictional and opportune." "Stefan Zweig's first novel reveals an expert story teller, a man with as thorough a grasp of the novelist's technique as of the biographer's. . . 'Beware of Pity' is primarily a good story; its material is not substantial enough to make it an 'important' novel. The psychology is acutely observed, but the people live on such a small scale of experience that there is not a great deal of psychology to observe. The point that pity is dangerous is incontrovertibly established, but it is not a very far-reaching point." George Stevens

"The book's high merit is in the presentation, through his own half-humble, half-pompous and entirely humourless narration and reflections, of the young man, Anton. . . "The narrative and the translation of it are excellently done. If fault were to be found with the story, it would have to be on the ground that it does not concern itself with life in broad, characteristic aspects, but singles out one restricted special aspect to be placed upon a series of slides for examination under the microscope. Thus its function as a portrayal of life is subordinated to its function as a special study, and the reader's reactions toward it tend more in the direction of intellectual than of primarily emotional response." "A bare summary of Herr Zweig's story can give no idea of the subtlety and skill with which it is developed, the vivid portrayal of the secondary no less than of the principal characters, the admirable fidelity of the social background. Once the reader admits the writer's interpretation of the initial incident, he will surrender himself with the keenest intellectual enjoyment to the novelist's elaboration of his theme."

928 Authors 39-27767

An omnibus volume containing three previously published works: Three Masters, Adepts in Self-Portraiture, and The Struggle with the Daimon. The first two were translated and published in English (Book Review Digest, 1930; 1928, 1929), the last now appears in English for the first time. The nine literary geniuses considered by the author in these essays are: Balzac, Dickens, Dostoeffsky, Hölderlin, Kleist, Nietzsche, Casanova, Stendhal, Tolstoy.

"Criticism can carry us far onto the invisible battlefield where the dramas of the intelligence are enacted, and vital forces transform themselves into philosophy, poetry, art. Under no obligation to invent genius, criticism is free to reproduce examples of it and examine the motives which underlie, the struggles which compose, the intellectual's mysterious inner dramas. And nowhere is this special power of criticism more clearly demonstrated than in the prodigious inner biographies composing 'Master Builders.' . . Particularly in the latter biographies, possibly his best ones, Zweig communicates the pressure of the involuntary force which is called genius. . . In respect to only one matter is Zweig's performance less than brilliant. This is his attempt to render his subjects typical. . . But this defect is unimportant. Moreover, despite an occasional slovenliness, and their curious failure to include the final section of the Hölderlin study in their translation, Eden and Cedar Paul have for the most part reproduced the original brilliance."
